POCKET DOOR PRO HENDERSON
FOR SINGLE DOORS

120kg | Wood | Interior | Soft Stop | Self Close

Professional sliding door solution that works with cavity walls for doors weighing up to 120kg

Overview

Pocket Door Pro is a professional hardware solution that allows doors to effortlessly slide into a cavity wall. Designed with a high quality, aluminium cavity frame, the system is extremely robust - making it deal for homes, educational buildings, hospitals, hotels and office blocks. The system is also ideal for disability access areas as well as rooms where space is limited such as bathrooms and ensuites.

The aluminium cavity frame comes with push together parts for easy and rapid installation. The system is available with an optional soft stop which catches the door in its final moments of travel and gently pulls it into position - preventing slamming.

The system is available in seven different kit sizes (which can be cut to size) and for finished wall thicknesses of 120mm and 125mm.

Available accessories include a timber liner kit, self close system and wide range of flush pulls and locks. The system is also available in bi-parting, fire rated and automated variants.
