HOW TO CUSTOMISE YOUR KITCHEN

CHOOSING THE LINE (1)

The first step in creating your customised outdoor kitchen is to choose the line that aesthetically and conceptually you like best.

The available lines are **ELBA** and **PANTELLERIA**.

The **ELBA** line is characterised by its convenient gola opening system. This system gives linearity to the kitchen front without losing the functionality of a convenient handle. All doors and drawers are equipped with the bluemotion adaptive damping system that eliminates the risk of impacts even under the most intense loads.

The **PANTELLERIA** line has a minimalist design thanks to doors with a tip-on opening system (push & open). The system allows the door to open automatically and smoothly with a slight pressure on the closed door or drawer. To close, simply push the door, or drawer, and it closes smoothly, thanks to the integrated bluemotion adaptive damping system.

TOPS AND SIDES (2 & 3)

After having selected the line and the modules that make up its body, we move on to choosing the top and sides.

It is possible to give your kitchen a stronger character by choosing the **4 cm** strong top and sides or a more refined look by selecting the **2 cm** slim type.

It is also possible to select for your kitchen a top with a **30 cm** snack extension and a total depth of 100 cm.

ACCESSORIES (4,5 & 6)

You can choose to place your kitchen on either legs or rotating wheels.

The latter option increases the mobility of the product and facilitates its movement within the covered outdoor area.

The choice of appliances and sink with its accessories is an important part of the customisation process of the outdoor kitchen.

With the right appliance and the presence or absence of a sink, the kitchen can become a key component to fully enjoy the outdoors of the home.
