

Heated Tapered Nozzle

Maximum Heat Transfer and Uniformity

- Swaged stainless steel construction
- Precision wound, high-surface area heating element wire
- Replaceable thermocouple
- Maximum pack density of the internal ceramic
- Long lasting

Superior Nozzle Body Design

- Premium quality hardened PM stainless tool steel
- Continuous taper ID
- Self-cleaning for more rapid color changes
- Ideal for polycarbonate (minimizes specks and streaking)
- Alleviates sulphidation with sulfone family of resins (20% chromium content)
- Ideal for Halogen Free Fire Retardants (HFFR)
