AirLife[®] manual self-inflating resuscitation devices II

AirLife[®] manual self-inflating resuscitation devices II are designed with a lightweight textured bag for secure handling and user comfort. The clear valve housing provides an unobstructed view of the valve operation while the 360° swivel connector provides optimal device positioning. All bags contain no latex or added di-ethylhexyl phthalate (DEHP). The oxygen tubing includes a universal connector for easy connection to an oxygen source. Accessories include a manometer,* positive end-expiratory pressure (PEEP) valve, CO₂ detector, expiratory filter and masks.

These devices feature:

- Collapsible adult and pediatric bags for easy storage
- Clear valve housing for greater visibility during use
- Two oxygen reservoir styles for increased flexibility: bag reservoir and tube reservoir
- Adult, pediatric and infant sizes in numerous configurations for your resuscitation needs
