Empower your patients to improve their injection routine with Unifine® Pentips® Plus

Single use of a pen needle is part of the global recommendation for good injection routine¹

People with active lifestyles, dexterity or visual impairments can find this difficult

+61%

increase in rate of pen needle change⁴

Proven improvements in the rate of pen needle change and designed for a comfortable injection experience⁴

A study observing the impact of Unifine® Pentips® Plus among patients injecting insulin revealed that patients changed their pen needle more often, with 86% finding it easier or as easy to use when compared to their previous pen needle⁴

57%

of injection pen users do not change their needle after each use²

The effectiveness of injection therapy in diabetes is helped by good injection routine. Reusing a pen needle can result in poor glycaemic control^{2,3}

Built-in removal system for convenience*

Premium quality pen needle designed for comfortable injections

Make it convenient for patients with Unifine® Pentips® Plus

A unique pen needle with a built-in removal system, proven to increase the rate of pen needle change⁴

* The used pen needle is secured in the interim container and must be placed in a sharps bin at the earliest opportunity. Pen needle image not to scale.
