

# Disposable Patient Warming Blankets

Cocoon blankets are made from soft, comfortable and light-weight non-woven fabric. All materials used in our blankets are latex free. Our unique microscopic perforations provide uniform air distribution without the risk of residue. The universal inlet port ties ensure the hose remains firmly in the blanket. The ties and strong fabric allows the use of same blanket on the patient from pre-warming through surgery to recovery.

## INTRAOPERATIVE BLANKETS

Model - **CLM 0101**

### Full Body

Size - 100 x 195 cm

Hose ports - 1
