

Softplus Nasal Cannula

Exceptionally soft material with Dipping technology maximizes patient comfort for long term oxygen delivery.
The softer lariat helps reduce chafing behind the ear to minimize skin irritation.

Feature

- Ear cushions help to relieve the pressure around a patient's ears to provide more comfort
- Extra soft nasal prong designs for maximum patient comfort
- Extremely lightweight and flexible
- Star lumen design oxygen supply tubing for crush-proof and kink resistant
- Over-the-ear design optimizes fit and stability
- Latex Free and Phthalate Free materials improve patient's safety
- Available with fits all connector to allow direct attachment to flowmeter

With Air cushion

Softplus Adult

Softplus Infant

Fits-All connector

Softplus Nasal Cannula
