# Supercath™ NEO Safety Fistula Catheter for Hemodialysis

## Supercath Feature

- **Supercath Neo, Safety Fistula Catheter, helps to reduce accidental needlesticks with passive and fully-encased needle shield**
- Applicable to AV fistula and AV graft
- Clamping the soft tube section with fingers or forceps enables connection to blood line system without blood leakage
- Side holes on catheter allow optimal and smooth blood flow
- Single piece jointless catheter design prevents clotting and ensures a smooth flow

## Supercath Benefit

- Minimizes risk of damage on vessel wall
- Can be used on nonideal access site
- Patients may move their arms during dialysis session
- Good alternative for patients with metal allergy
- Smaller sized needles can be used to minimize cannulation site trauma
- Decreased procedures related to cannulation complications such as damage to the blood vessel
- Increasing the access survival and cost saving related to access care
- No need to deal with the sharp needle at the end of the dialysis session

Product NO.	Catheter (mm)			Needle Gauge	No. of Side Holes	Packing
	Length	O.D.	I.D.
