a product of
genimpex_{sr1}

genimpex presents a complete range of floor mats for contamination control in sensible environments:

the original decontaminating **SALUBER**, the tailor-made and marketing oriented **DASTIK**, the heavy duty **SALUBER CLEAN** and the fluid collector **SALUBER DRAIN**.

All together provide an effective and practical solution for everyday cross infection control!

DASTICK

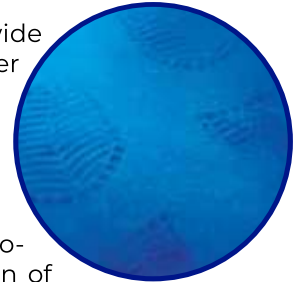

A MULTILAYER DECONTAMINATING MAT USED IN ALL ENVIRONMENTS THAT REQUIRE THE TOTAL ABSENCE OF CONTAMINATING AGENTS AND THE PRESERVATION OF HIGH HYGIENE LEVELS

Thanks to its **antibacterial adhesive**, SALUBER captures and retains a wide spectrum of dangerous bacteria, fungi and yeasts working as the best barrier against the growth and proliferation of such microorganisms.

SALUBER is a **CE marked medical device**, its antibacterial efficiency is fully certified.

Adhesivity tests are carried out for each production lot in order to grant zero-risk of transmigration of glue to shoe soles and consequent contamination of sensitive areas.

SALUBER is available in 3 colours and 6 standard sizes: blue, green and white mats are on stock both in 115 and 90 cm width. Total mat thickness is less than 2 mm.

Colours, sizes and packaging can be **customized** according to client's request. SALUBER can be manufactured to display client's logo or brand.

SALUBER is made of 30 numbered disposable layers. **Numbers are printed** directly on each layer surface without any extra thickness caused by applied corner stickers.

A long, non-adhesive lid along one side of the mat allows an **easy and safe removal of used layers** without risk of ripping or hand contact. SALUBER provides an immediate product ending warning as mat colour fades into lighter tone with the progressive usage of its layers.

Despite its limited thickness, SALUBER has a semi-rigid structure and can be therefore stored vertically.

The original **KARTELLA DISPENSER** folder allows for comfortable handling and **vertical storage**. Each mat can be easily withdrawn leaving the remaining content perfectly stored.

REF	FEATURES	SIZE	PCS x BOX
DK-1245-B/T/V	30 Layers - printed numbers - vertical storage - blue; white; green	115 x 45	5
DK-1260-B/T/V	30 Layers - printed numbers - vertical storage - blue; white; green	115 x 60	5
