**Please note that the label sizes listed are NOT recommendations. They are what we would consider the maximum size for particular jars. You could go smaller to accentuate the contents or go with the max. You also have some options on shapes. Please contact us if you have questions.*

The numbers listed above are printers we work with. They will all be familiar with food labels and our labeling machine (in the event we apply labels for you). If we will be applying your labels, they will need to be on rolls. If you go with a printer other than one listed above, please contact us for a copy of our **Label Specification Sheet**.
