

Hawai'i State Art Museum Sculpture Garden

Trigger Picasso Energy

Title: *Trigger Picasso Energy*

Medium: Enamel fused glass, gold leaf, photovoltaic solar cells and stainless steel

Function: Canopy shelters from the sun and plays with natural light: transparent, colored and opaque glass project patterns upon the Sculpture Garden walls, stairs and patrons and changes throughout the day. Solar cells collect energy that is fed into Museum Mainframe and assist in powering flood light that illuminate the canopy by night.

Competition: Hawai'i State Foundation on Culture, Art in Public Places and the Arts Open Call to Hawai'i artists

Site: Hawai'i State Art Museum Sculpture Garden

Installation: 2012

Dimensions: 48' long x 8' wide x 10' to 14' tall
