

Classic i series

Intelligent air purifier

A white Blueair Classic i series air purifier is positioned in a kitchen. The purifier is a tall, rectangular unit with a white front panel and a dark blue top section. It features a small blue dot and the 'blueair' logo on the front. The background shows a white kitchen island with a marble countertop, a vase of white tulips, and various kitchen items. The floor is made of light-colored wood.

**Clean air
for everyone**

Classic i series

Performance you can trust

The Classic is Blueair's most iconic range of air purifiers. It's an intelligent product equipped with integrated sensors that scan the air quality in real time and adjust the fan speed depending on the current air quality. The patented HEPASilent™ technology is at the heart of the Blueair Classic as it efficiently cleans the air of your home while making no more sound than a whisper. Made with high quality steel, it's a product that is sure to last for many years to come.

To get the full Classic experience, make sure to download the Blueair Friend app and you will be able to connect and control your air purifier from wherever you are.

Makes healthy living effortless through highly efficient air purification and intelligence features.

Blueair's patented filtration technology, HEPASilent™, removes 99.97% of TVOCs, pollen, dust, pet dander and more.

Minimizes triggers for people with allergies, asthma and other respiratory illnesses.

Casters let you easily move the Blueair Classic 680i. Optional for the Blueair Classic 480i.

Integrated sensors scan the air in real time and adjust the fan speed according to the current air quality.

Download the Blueair Friend app to connect and control your air purifier from wherever you are.

Blueair Classic 680i

72 m²
(775 sq. ft.)

Feel right at home. The 680i is the largest in the popular Classic i series and is equipped with intelligent air purification features that efficiently remove airborne particles by up to 99.97 %. No coughing or wheezing, just air as fresh and clean as nature intended.

Blueair Classic 280i

The Classic 280i is small in size, but big on delivering clean air. It's quiet and efficient, using HEPASilent™ technology that combines mechanical and electrostatic filtration for the most efficient air purification. With award-winning Swedish design, the Classic 280i is an excellent choice for a smaller room or apartment.

Blueair Classic 480i

Living well means knowing how to control the quality of the air you breathe. The wide range of Classic i series air purifiers remove allergy and asthma triggers, making the 480i the recommended choice by the Swedish Asthma and Allergy Association. With a 480i air purifier you can feel better by breathing cleaner air.

^A Specifications based on U.S. models (120 VAC, 60 Hz with particle filter).

^B The CADR indicates how much filtered air is delivered (airflow) by the air purifier operating at the highest setting, and how well the system removes tobacco smoke, dust and pollen pollutants from the air (efficiency). Tests are performed in accordance with ANSI/AHAM

AC-1. The maximum possible CADR ratings according to this standard are: Tobacco Smoke: 450 cfm. / Dust: 400 cfm. / Pollen: 450 cfm.

^C Air change per hour is calculated on the recommended room size, assuming 8 foot (2.4 m) ceiling. The air change rate per hour will increase for smaller rooms.

^D Recommended interval for filter replacement is 6 months.

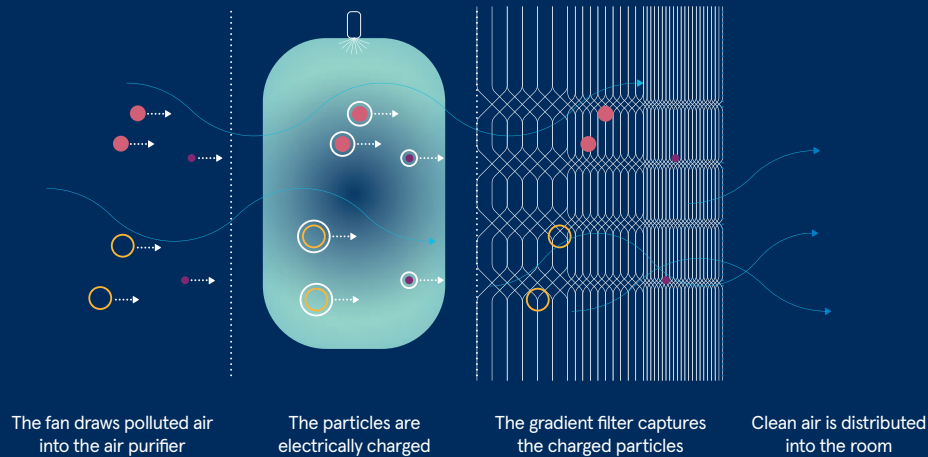

^E Blueair units comply with quality, safety and regulatory

requirements of the countries where they are sold. Blueair units comply with international standards, including the CE mark, S mark, CB Scheme and ETL Listed Mark. National standards are controlled by the distributors responsible for the market.

^F Blueair Classic 580i and 680i includes activated carbon sheet.

Blueair HEPASilent Technology

Efficient air purification while making no more sound than a whisper

Best-in-class filtration for every need

The patented HEPASilent™ technology is a revolutionary innovation that combines electrostatic and mechanical filtration to clean the air of 99.97 % of airborne particles as small as 0.1 micron in size.

- Highly efficient particle filtration can be combined with activated carbon filtration media to remove gaseous pollutants
- Saves energy with super low energy consumption
- Less dense filter media, which means lower noise levels

Particle Filter

Designed for maximum removal of airborne particles. It's the perfect choice for removing pollutants like pollen, dust, pet dander and other particles as small as 0.1 micron in size.

SmokeStop™ filter

Particle filter with activated carbon to use in rooms where you need to remove heavy gaseous pollutants like tobacco smoke or volatile organic compounds (VOCs).
