TIPS ON PROPER MAINTENANCE OF EMERGENCY LAMPS USING RECHARGEABLE BATTERIES:

- To prolong the battery life, it must be discharged and charged every 3 months during storage.
- Emergency lamps for residential use must not be left unattended during charging. Charging time must not exceed 24 hours and must be unplugged after charging.
- Emergency lamps for commercial use can be left charging continuously, but must be discharged every 3 months.
- Refer to qualified technician for repair.
- Carefully read manual before use.

Our 5-step Purification System gives you fresh air in its purest form.

5-in-1 Purification System:

Pre-Filter + HEPA H13 True Filter + Carbon Filter + UVC + Ionizer

1. **Pre-Filter** captures initial dust and allergen particles.
2. **HEPA H13 True Filter** eliminates particles down to 0.10 microns (up to 99.91% filtration rate). Made in Korea.
3. **Carbon Filter** captures dust and allergen particles, helps reduce the VOC, toxic fumes and neutralizes foul odor.
4. **UVC Light** destroys microorganisms such as germs, viruses, bacteria and fungi (such as mold toxins).
5. **Ionizer** releases negative ions using electricity to help capture finest dust particles that may have escaped from the filtering process.
