Machine washable at max. 30°C. Ironing restores the protective layer 	0,50	n.a.	260 g/m ²	Outdoor & indoor	The fabric has a water column of 350 mm (EN 20811)	7/8 (ISO 105-B02)	/

* NEN-EN13501-1 A1

Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.

Warnings

General

- Do not use any sharp tools to open the packaging.
- We strongly advise against using power tools.
- Tripping hazard, mind your step.
- Do not put out cigarettes on the table.
- Not graffiti proof.
- Do not leave children unattended whilst playing on the table.
- To avoid danger of suffocation, keep plastic bags away from babies and children.
- Colours can differ over years and from batch to batch.

Product

- Do not stand or jump on the table.
- Do not drag the table, but carry it with minimum 2 people.
- Anchoring the product has to be done by qualified people.
- For anchoring: use suitable bolts or screws from a specialized store depending on the material your terrace is made of.
- There is protection felt for delicate floors or indoor use.
- Do not stand on the Lazy Susan or on the benches.
- The white Lazy Susan reflects in the sunlight.
- Mind your fingers whilst assembling the Lazy Susan.
- Max. 3 people or 240 kg per bench.

Wood

- When delivered, the wood is untreated.
- Wood is a natural material and its look is different for every slat, plank and tree.
- Wood will gradually become rougher and start to turn grey as a consequence of exposure to the sun and rain. We recommend oiling the wood at regular intervals depending from location and general weather conditions.
- Clean regularly with mild detergent. Never use a high pressure cleaner as this will roughen the wood's smooth surface and irreparably damage the wood's fiber.
- Thorough cleaning with Extremis Wood Cleaner.
- We strongly recommend that you treat your wood with wood protector to protect it from stains - Small cracks and crevices can also appear as part of this process. We strongly advise everyone to treat the furniture with our Wood Protector.

Galvanised steel

- Galvanisation will become less shiny when used outdoors.
- Flame retarding - NEN-EN13501-1 A1 - Class A1 products will not contribute to fire in any stage, including fully developed fire. For this reason, they are assumed to be capable of satisfying all requirements of all lower classes as well.
- Possible impurities in the immersion tank can cause

black marks during galvanization, which are intrinsic to this industrial finishing technique.

- White marks on this zinc layer are also intrinsic to this procedure and will disappear when the furniture is put outdoors.
- This industrial finishing technique may result in a rougher surface. This is intrinsic to the process.

Powder-coating

- White powder-coating requires more maintenance.
- Do not use abrasive scouring powders or scourers as they will scratch the surface.
- Colour can fade to some extent when exposed to UV.
- Flame retarding - NEN-EN13501-1 A2-sl - Satisfying the same criteria as Class B for the SBI-test according to EN13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.
- Dark colors can get very hot in sunny weather.

HPL

- UV colour fastness: >6 (EN438-2:27) en (ASTM G53-91)

Sunbrella

- Not waterproof, store inside!
- Shake or brush off loose dirt immediately.
- UV colour fastness: 7/8 (ISO 105-B02).

Applications

Residential: the perfect family picnic table for your terrace, patio or courtyard.

Project: hotel and catering industry, company terraces, public spaces, squares, event venues, schools, ...

Good to know

- PEFC™ certified wood originates from sustainably managed forests.
- The hole in the tabletop to place a parasol in is ø65 mm.
- Pantagrue picnic combines perfectly with Inumbra ø350, ø400 & Inumbria ø380. For both combinations, a connection piece is required

- Pantagrue picnic is fitted with a Lazy Susan, a central rotating tray, to easily pass things through. The Lazy Susan can be fixed for use in public spaces

F.a.q.

Q: Do you need to oil the wood?

A: Just like other types of wood, Iroko will gradually become rougher and start to turn grey as a consequence of exposure to the sun and rain. Small cracks and crevices can also appear as part of this process. We strongly advise everyone to treat the furniture with our Wood Protector. This 100% natural oil controls the moisture level within the wood, which makes the planks stay stable for longer, and the layer of oil also helps to prevent spilled liquids from being absorbed, so that stains tend to stay superficial. It is best to repeat this treatment at regular intervals.

Floor fastening

Pantagrue comes with an optional floor anchoring set: four steel plates to be fixed with bolts.

Awards

Maintenance

Find maintenance instructions at the downloads section of extremis.com for:

POWDER-COATED PARTS

- White powder-coating obviously requires more maintenance.
- Clean stains with a magic eraser.

GALVANISED PARTS

- How to repair a damaged zinc layer.

WOOD

- Clean regularly with mild detergent.
- Thorough cleaning with Extremis Wood Cleaner.
- Oil the wood with Extremis Wood Protector. We recommend oiling the wood at regular intervals depending from location and general weather conditions.
- In order to smoothen the surface again after a thorough cleaning, lightly sand your wood with 80 grit sanding paper or a sanding pad.

RECOMMENDED USAGE

- For Extremis Wood Protector:

		
5 to 7 wood care treatments	2 to 4 wood care treatments	150 - 250 ml for one Pantagrue picnic
