

Wilkes Modular Sofa Group

Designed by Ray Wilkes and first introduced in 1976, Wilkes Modular Sofa Group has made a lasting impression with its distinctive silhouette. We've updated the essential postmodern design with power and material options. Everything else we've kept the same, from its injection-molded foam cushion construction to its integrated table option.

Designers

Ray Wilkes

Original Release

1976

Benefits

- Provides a surprising level of individual comfort, thanks to rounded-edge cushions and steel brackets with enough give that each back section can flex independently
- Comes in a range of configurations, from a single chair to a six-seat sofa
- Available with power for additional functionality and many upholstery options, making it adaptable to a wide variety of architectural styles

Warranty

5 years

Wilkes Modular Sofa Group

Key Features

1. Optional Tables

Tables, which can be specified wherever there's a seating unit, hold personal items and create a buffer for personal space.

2. Power Kit

Power modules with USB ports can be added to all sofa group options to make charging technology easy.

3. Injection-Molded Foam Cushions

The rounded-edge cushions, likened to the shape of Chiclet gum, never "puddle" or lose their shape.

4. Angled Seat

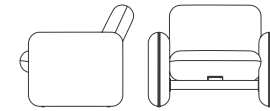

The geometry of the 105-degree angle of the seat and back provides a perfect pocket for comfortable sitting.

5. Multiple Material Options

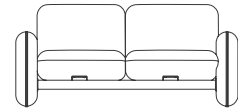

It's still available in bright solids, like the original, but also can be upholstered with Maharam textiles.
