

G4 LAMP

12V LAMP

Total Light's LED G4 light bulbs are the best way to have a bright and long-lasting lighting system. Made to be used in enclosed fixtures and damp environments, these bulbs have been tested and measured to last 25,000 hours at 12 volts.

Customers can also pick from two variations; a 2.5 watt version, and a 3.5 watt version. Models can have color temperatures of 2700K or 3000K. Light level can also be modified with additional Lutron Magnetic Dimmers to get the perfect mood for your lighting system.
