

The TL-REMOTE is an installer remote to help tune and perfect the perfect color temperature of your design(2700 or 3000K). With the option to dim or add more lumen output to the scene, the installer can easily fix imperfections that standard fixtures leave behind. The TL-REMOTE has a range of 6-24 inches from each fixture, and controls 1 fixture at a time. We recommend using the remote for install purposes only, and not as a daily use item.

SPECIFICATIONS

On/Off, Dimming, Dual CCT 2700k and 3000k Inter-changeable

This item works with the TL-HS200-CB & TL-SL200-CB
