

TL-TRAN200-SS

200 WATT TRANSFORMER

Total Light's 200 WATT Transformer ensures that the low voltage landscape lighting system runs efficiently while providing a stable source of 12 to 15 volts for large landscape lighting projects. It's heavy-duty stainless steel cabinet is built tough for indoor or outdoor use and has a large internal compartment and a Toroidal core that provides a more efficient operation. The large terminal strip makes wire install easy, while a quick mount bracket, pre-scored knockouts, and a plug in ready timing receptacle allow for quick installations.

The transformer also features a sealed door and a 6 foot heavy duty power cord. The internal wiring is rated up to 125° C with a 115 AMP Terminal Block included. Other inclusions are a surge suppressor, primary thermal protection, and a secondary side magnetic circuit breaker.

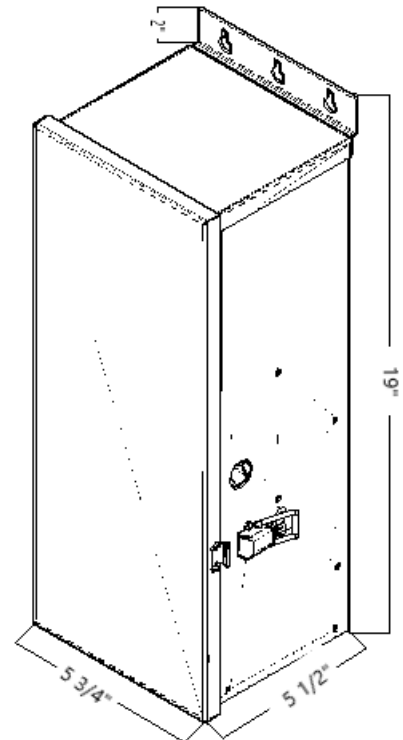

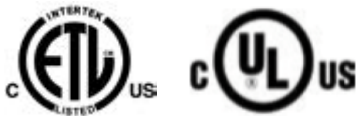

SPECIFICATIONS

- Wattage: 200
- Construction: Stainless Steel
- Supports: 12v to 15v systems
- Wire Rating: 125° C
- Terminal Block: 115 Amp

FEATURES & BENEFITS

- Easy, quick mount installation
- Lockable door
- Toolless bottom panel
- Intuitive design and timer
- Pre-scored knockouts
- Surge suppressor
