Plugs X 64, Caps x 20, Sleeves x 8

Tools needed: Hammer (to tap stake in place)

FRAMEITALL 101

- The anchor joints in your kit are designed to grip the ground tight, so your garden edging will stay put even with frozen heaving ground.
- Our garden edging anchor brackets pivot 270 degrees, allowing endless design options.
- Your tool-free straight modular border kit can also be combined with our tool-free curved border kits to create more interesting designs.

DID YOU KNOW? You can stack your landscape edging higher to create higher borders or to create levels and cascading features? Simply order additional tool-free boards and snap-lock stacking brackets (your kits come with anchor brackets). The modular design of all Frame It All products means that you can add, stack, re-design or re-purpose your materials any time the mood strikes.

ASSEMBLY INSTRUCTIONS

STEP 1:

Layout your timbers along the borderline and connect each timber together by inserting the top of the stake through the bracket loops with the stake pointing to the sky. This enables you to freely position your border to get your desired location (refer to image on right **A**).

When your desired location is achieved slide out your first stake, flip it around **B** and drive the stake point through the bracket loops and into the ground.

STEP 2:

Drive the stake level with the top of the bracket so the cap can snap onto the stake. If you have driven the stake too far into the ground, you can either pull the stake up (enough to put the cap) or simply apply gorilla glue to the cap onto the stake.

Continue doing the same to all the stakes.

STEP 3:

Finish off each end of your border using the finishing sleeve to give your border that clean finished look!

NOTE: If you are edging or bordering around a playground or garden that is enclosing itself, you won't need the finishing sleeves and extra stakes.
