WELCOME TO SPORTDOG®

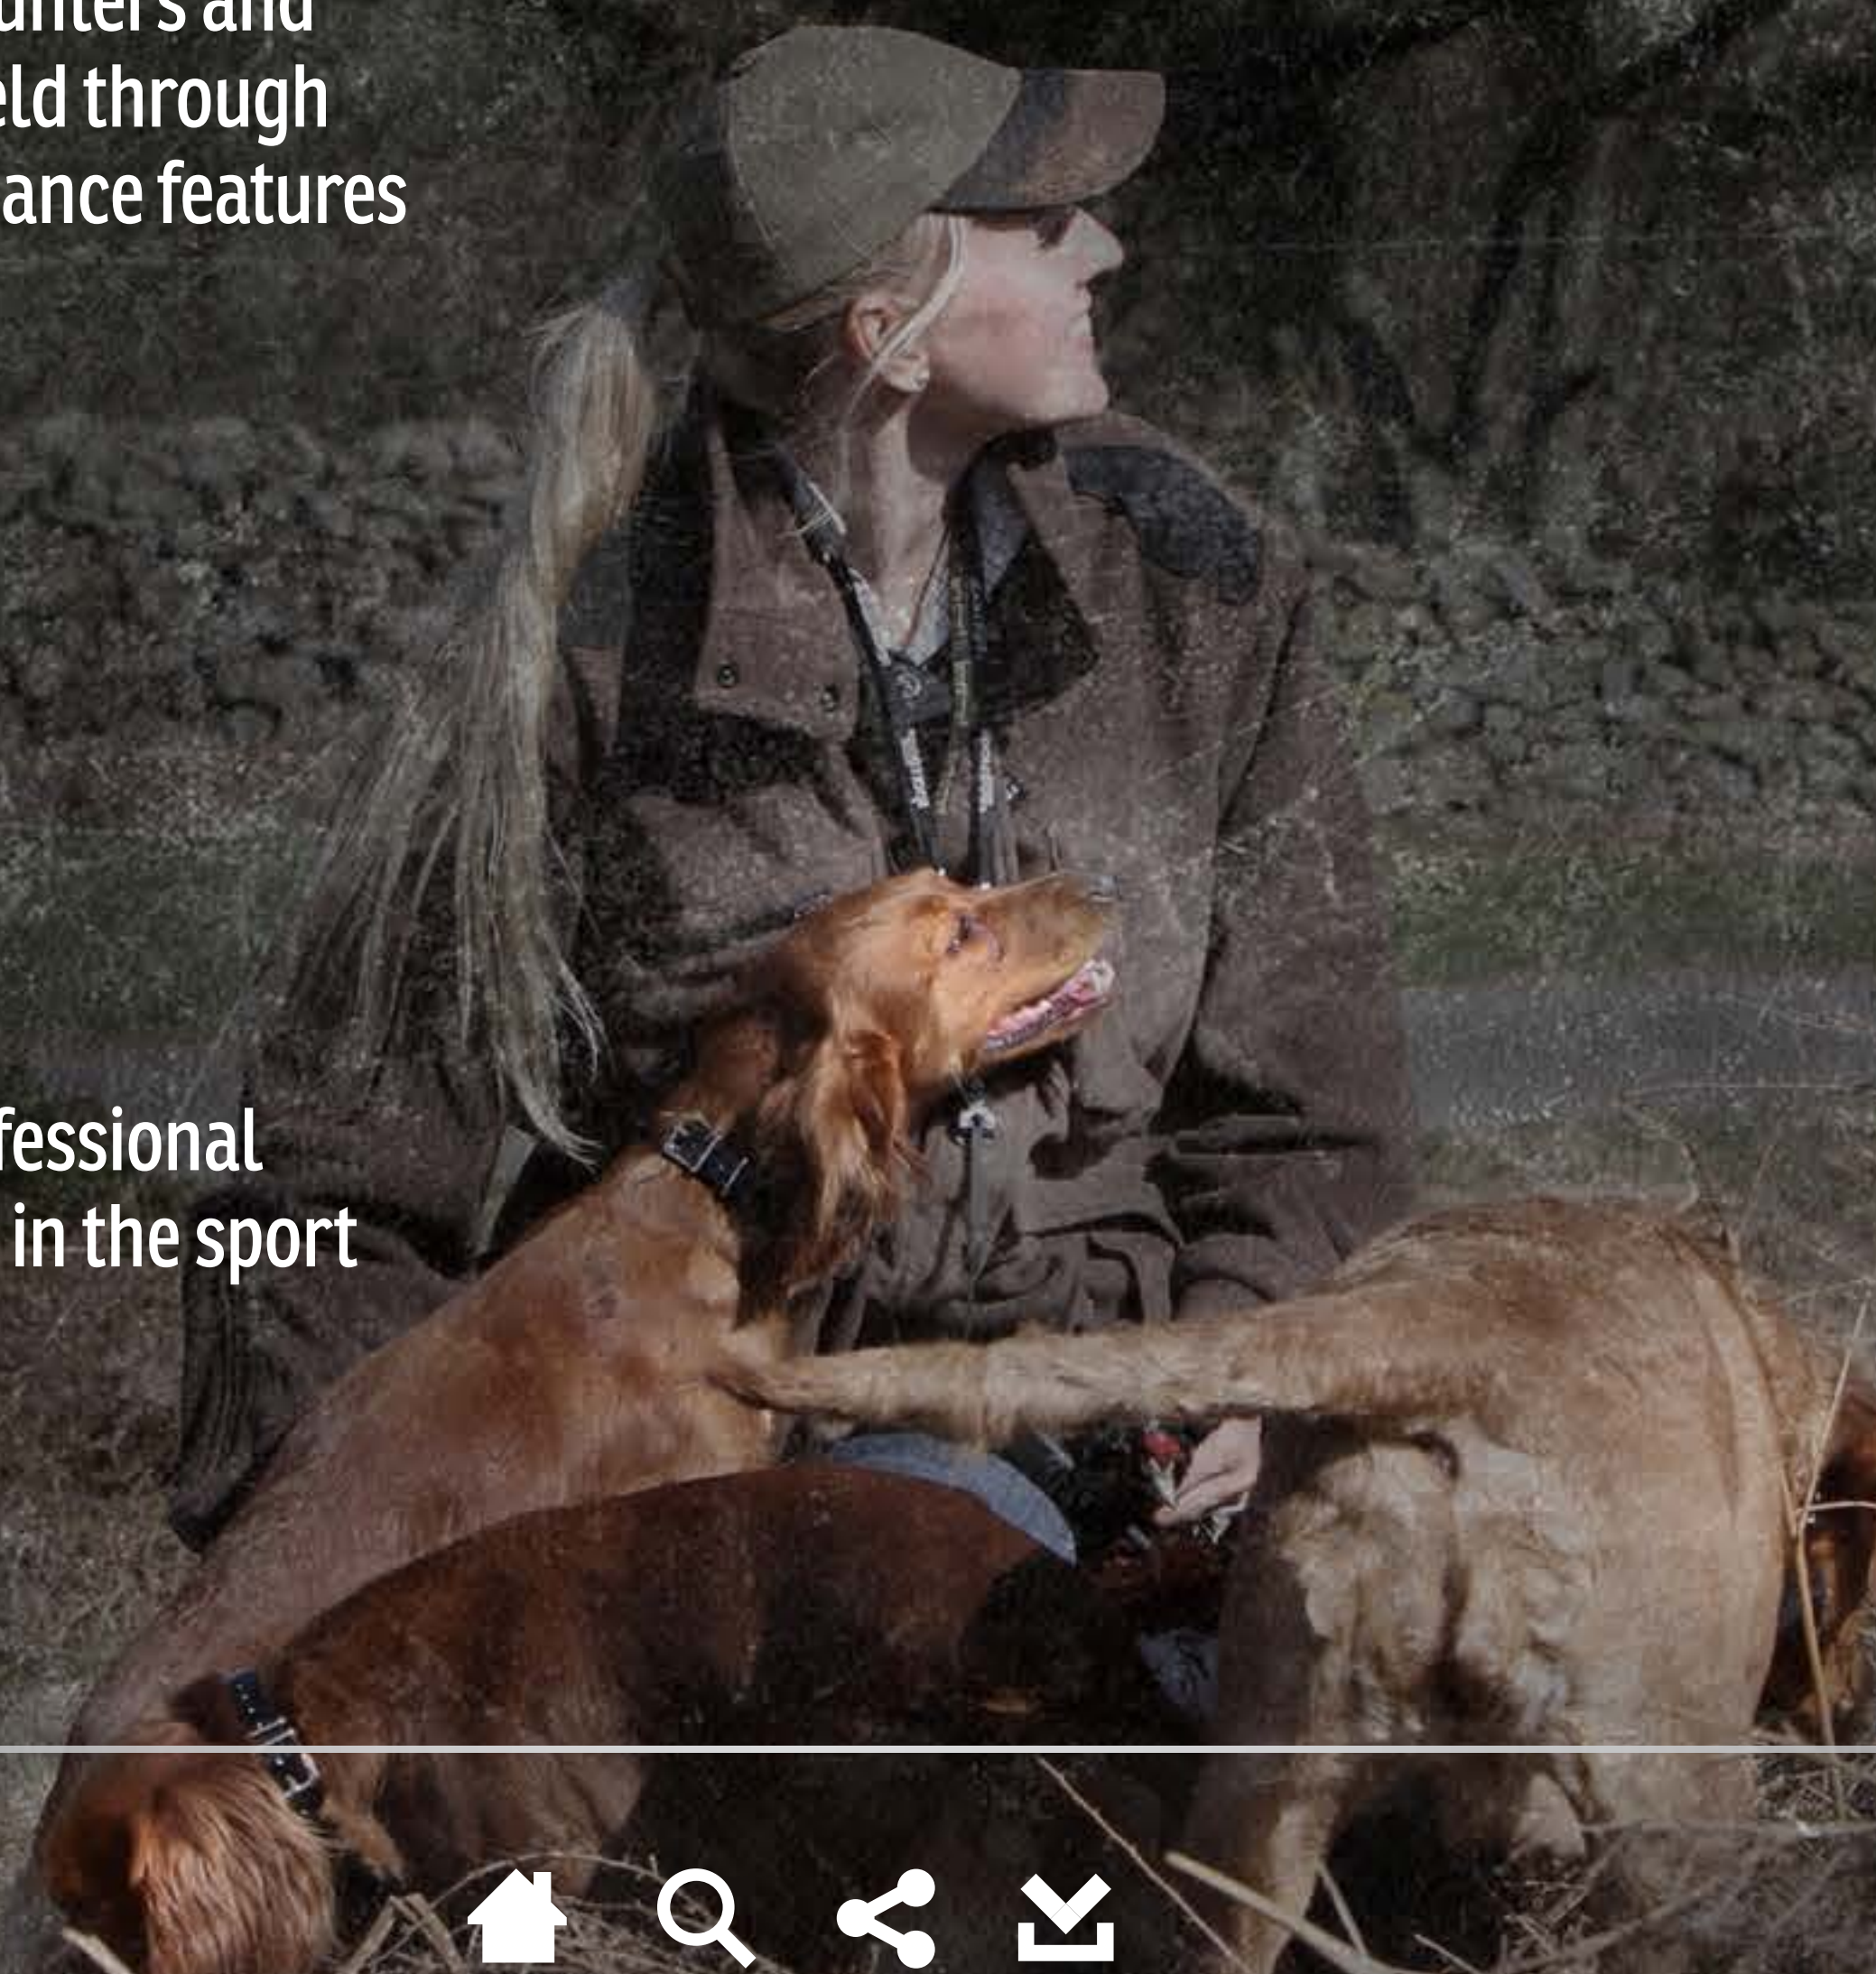

In 2003 SportDOG® Brand was created by Radio Systems Corporation with the aim of developing a range of superior products that would perform to the ultimate standards in the field and become the brand of choice for hunters and professional trainers. SportDOG® leads the field through technological advances and superior performance features you've come to expect.

The acquisitions of Innotek® in 2006 and Lucky Dog™ training equipment in 2007 further enhanced our product offering.

2012 saw the introduction of a brand new product, TEK Series 1.0, which represented a breakthrough in innovation by offering a revolutionary combination GPS Tracking and Training system.

SportDOG® redefined tracking technology again in 2014 with the introduction of TEK Series 2.0 which in terms of range, accuracy, and reliability, surpasses every other tracking system on the market. Again SportDOG® combined outstanding tracking technology with the premium training technology for which the brand is renowned.

From professional trainers, to weekend hunters, to those who just want a little peace with their dogs, people like you have simplified their dog-training challenges by trusting one of the foremost names in the electronic collar industry. SportDOG® is now able to provide the most complete line of e-collar, training and tracking products in the world. We have just the right product for your dog's size, level of activity, behaviour and environment.

WHO WE ARE

The SportDOG® Brand team is made up of professional staff with many combined years of experience in the sport and hunting arena.

Our extensive product development processes ensure that we provide product ranges with superior performance features. We design our products in the field, testing them in challenging environments and in conditions such as heat, cold, rain, snow, dust, mud and wind. Every sportsman knows such conditions are just part of the hunt. To us, these field sessions are just part of the product development process, and until we have tried and tested them in these conditions, we would not be confident with our product specs - SportDOG® products perform.

Our product development processes and customer service support show that we are committed to making sure that you and your customers get exceptional products and sound advice. That commitment, combined with our belief in innovation, plus our market leading products ensures that our customers will always receive the very best SportDOG® experience.

It's who we are and how we've operated from the beginning. It must have been what the industry needed, because today, just a few short years after SportDOG® Brand was created, the brand is the most recognised in the electronic collar dog training category.

Our products are known not only for their quality, but also for being the best value for money.

It is our dedication to these initiatives that helps us to keep delivering products that perform unfailingly in the most demanding conditions.

ECMA™

ECMA™ - Promoting the use of humane static stimulation training products.

FOR PET PROTECTION

[READ MORE](#)

DRYTEK™

SportDOG® Brand doesn't believe that waterproof is an option. It is a requirement. Wherever you see the DRYTEK™ logo, this is our assurance that our products meet that requirement.

[READ MORE](#)

ECMA™ - Promoting the use of humane static stimulation training products.

As a founding member of the Electronic Collar Manufacturers Association™ (ECMA™), Radio Systems Corporation is proud of its role within this organisation. ECMA™ was created in March 2004 as a result of increasing awareness from different manufacturers concerning the necessity of regulating their industry.

Members of this association continuously endeavour to improve their products and user guides enabling effective and reliable training while protecting animal welfare.

- Well trained pets enjoy a better quality of life because they have more freedom to explore their environment in safety.
- Effective and unobtrusive containment systems protect pets from hazards while allowing them freedom to explore a predetermined safe environment.
- Humane anti-barking products manage nuisance barking quickly and effectively, enabling dogs to remain in loving households within urban environments.

All ECMA™ members' products meet the latest Technical Requirements which enable training while protecting animal welfare. All members' user guides use the ECMA™ Code of Practice as a reference providing consistent instructions for effective training techniques while protecting animal welfare.

The Technical Requirements and Code of Practice apply to electronic stimulation, vibration, ultrasonic, sonic and spray collars (remote trainers, anti-bark collars and containment fences), pet tracking systems and any other companion electronic training devices.

ECMA™ is committed to improving the quality of lives of pets while protecting animal welfare. ECMA™ welcomes debate of robust scientific evidence with a view to constantly improving the effectiveness and safety of products.

DRYTEK™

SportDOG® Brand doesn't believe that waterproof is an option. It is a requirement. Wherever you see the DRYTEK™ logo, this is our assurance that our products meet that requirement.

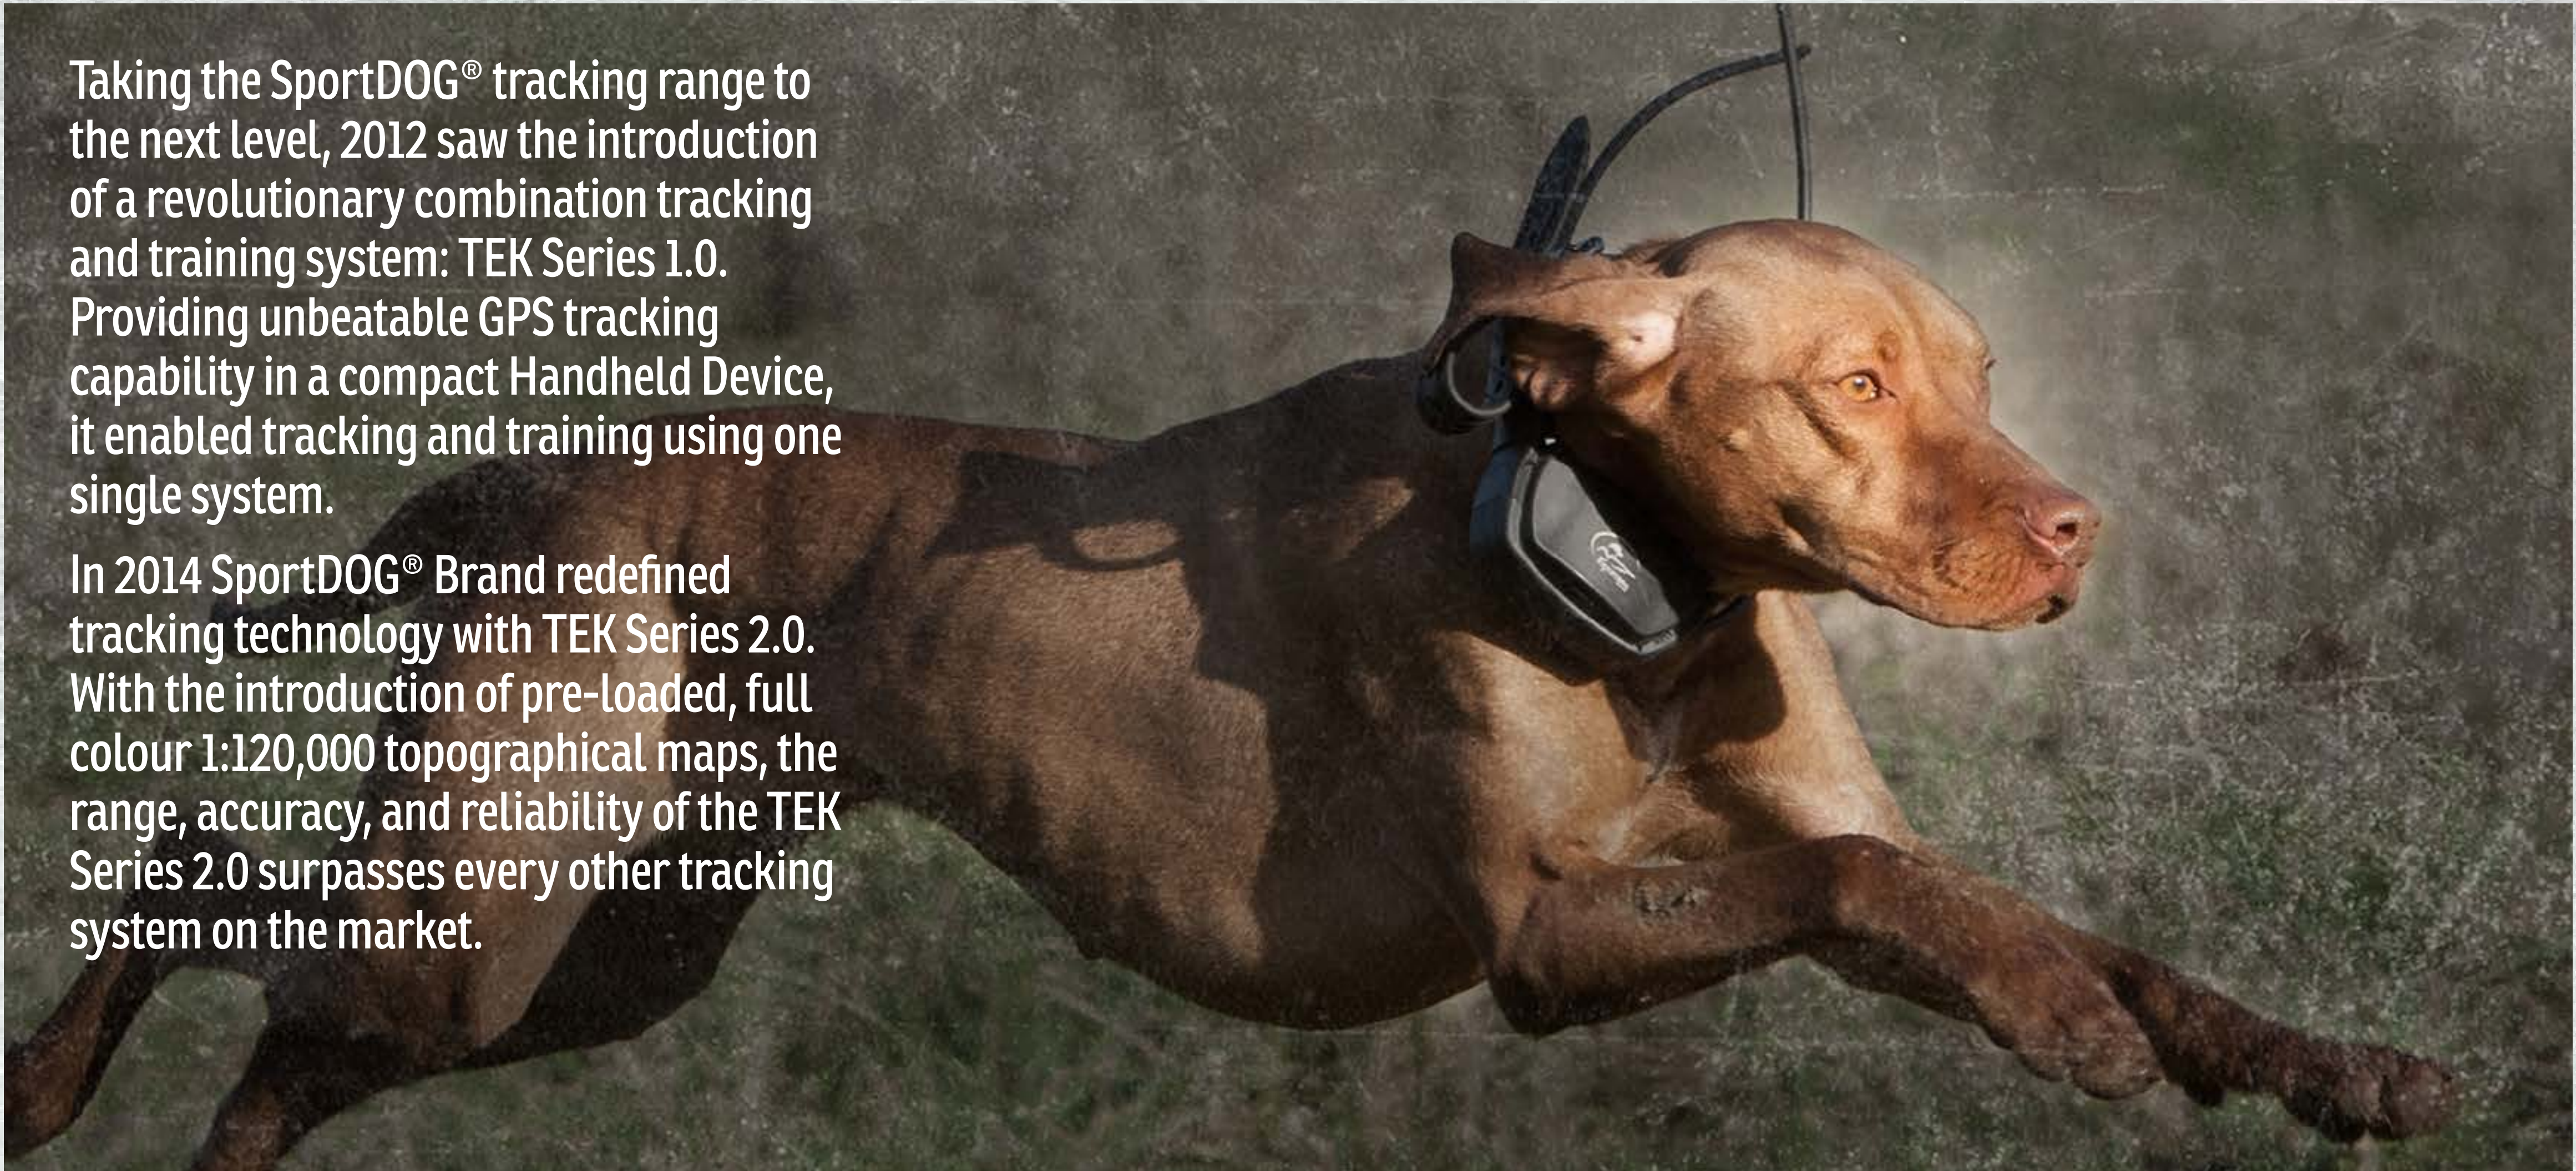

DRYTEK™ standards are guaranteed waterproof and submersible down to 7.6 metres.

Mile after mile and retrieve after retrieve, you know that it will work.

TRACKING & TRAINING

Taking the SportDOG® tracking range to the next level, 2012 saw the introduction of a revolutionary combination tracking and training system: TEK Series 1.0. Providing unbeatable GPS tracking capability in a compact Handheld Device, it enabled tracking and training using one single system.

In 2014 SportDOG® Brand redefined tracking technology with TEK Series 2.0. With the introduction of pre-loaded, full colour 1:120,000 topographical maps, the range, accuracy, and reliability of the TEK Series 2.0 surpasses every other tracking system on the market.

TEK SERIES 2.0

SPORTDOG® BRAND HAS REDEFINED TRACKING TECHNOLOGY WITH THE INTRODUCTION OF TEK SERIES 2.0.

In terms of range, accuracy, and reliability, the TEK Series 2.0 surpasses every other tracking system on the market. Track and train up to 21 dogs at a range up to 16 km line of sight. With SportDOG® HOPTEK™ Frequency Hopping Spread Spectrum technology, you'll receive location updates consistently and precisely – no interference. View your dogs and other hunters in your party on the pre-loaded, full colour 1:120,000 topographical maps. Audible feedback on the location and status of all tracked dogs and hunters provides hands-free updates while in the field. Adjustable GPS update rates ensure on-time tracking information.

In addition to tracking and location technology TEK Series 2.0 features the premium training technology for which SportDOG® Brand is renowned. Whether training or hunting, enjoy total control of your dog via up to 99 static stimulation levels, along with vibration and tone stimulation options. Personalise your Handheld Device to use continuous, momentary, rising, and programmable static stimulation modes. The TEK 2.0 GPS Collar and E-Collar Module are fully DRYTEK™ waterproof and submersible to 7.6 m. You won't lose track or communication with your dog, no matter the field conditions.

TEK SERIES 2.0 SYSTEM REQUIREMENTS

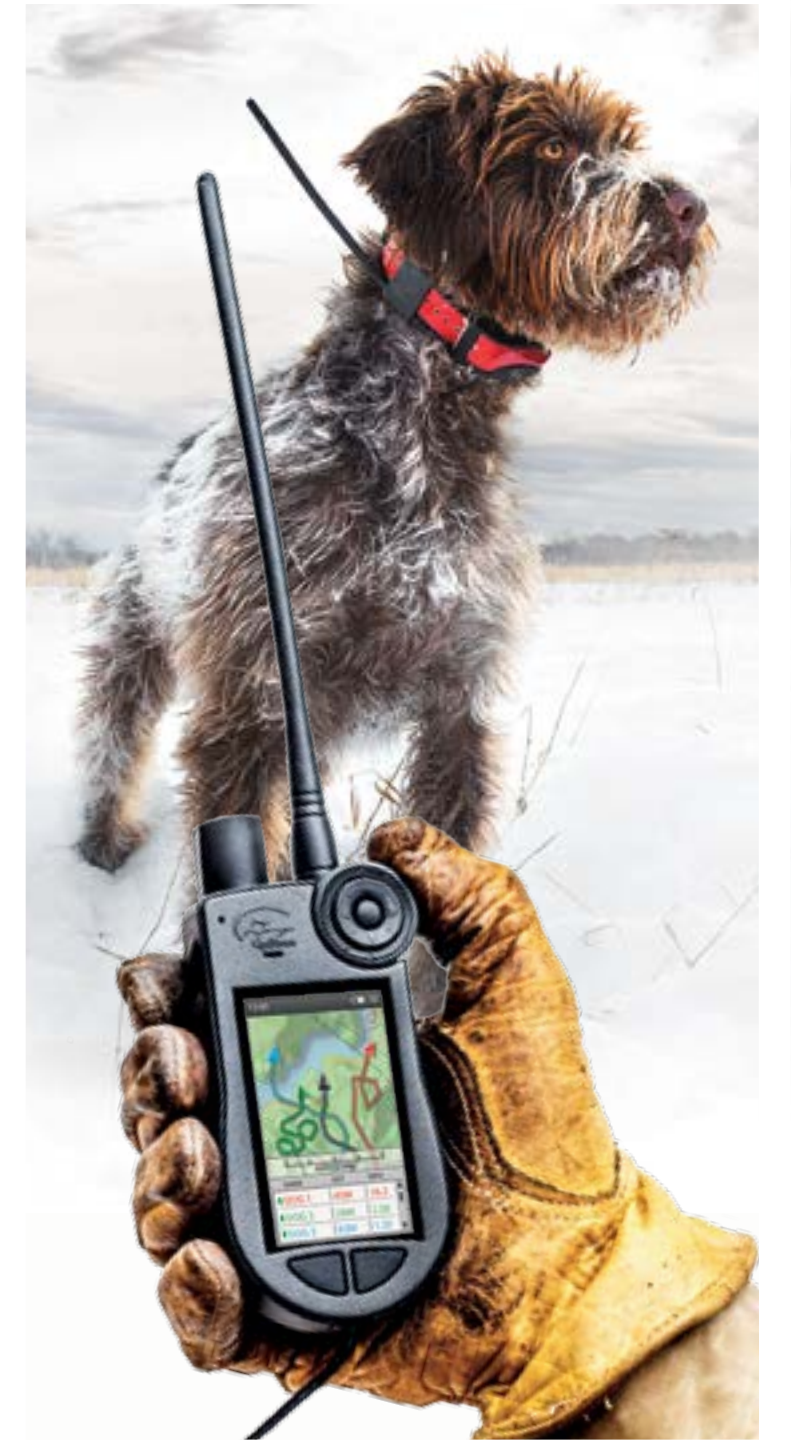

- :: MICROSOFT WINDOWS VISTA
OR NEWER**
- :: MAC OS X 10.7 OR NEWER**
- :: PENTIUM 4 / ATHLON 64
OR NEWER CPU**
- :: 10 GB HD SPACE**
- :: 1024X768 OR HIGHER MONITOR**
- :: OPENGL CAPABLE GRAPHICS CARD**

Radio Systems makes no warranty as to the accuracy or completeness of map data in this product and disclaims any and all express, implied, or statutory warranties. It is the user's sole responsibility to use this product properly. This product is not intended to be used for any purpose requiring precise measurement of direction, distance, location, or topography.

TEK SERIES 2.0 HOW IT WORKS

The SportDOG® Brand TEK Series 2.0 Systems have been proven safe, comfortable, and effective for all dogs over 3.6 kg. Consistent, correct use of this product allows you to track your dog, reinforce commands, and correct misbehaviour from up to 16 km line of sight. The Handheld Device receives your location from its built-in GPS antenna and receives location updates from the GPS antenna mounted on the Collar to track the location of your dog. The Handheld Device sends a signal, activating the E-Collar Module to deliver a harmless stimulation.* With proper training, a dog will learn to associate the signal with a command. Like all SportDOG® products, this model features adjustable static stimulation levels so you can tailor the stimulation level to your dog's temperament, eliminating the risk of over-correction.

*TEK-V2LT and TEK-2AD have E-Collar functionality. To add E-Collar functionality to your TEK-V2L, you must purchase the TEK-2T E-Collar Module.

TEK SERIES 2.0 GPS TRACKING SYSTEM

PRODUCT INFORMATION

Just when it seemed GPS tracking technology couldn't get any better, SportDOG® Brand has again changed the game with the introduction of the TEK Series 2.0 GPS Tracking System. In terms of range, accuracy and reliability, the TEK Series 2.0 GPS Tracking System surpasses every other system on the market.

Preloaded 1:120,000 full-colour topographical maps keep you on course while the system provides feedback on your dog's location... or even up to 21 dogs simply by adding additional collars (TEK-2L) to the system. How does SportDOG® do it? With features that prove this is the pinnacle of tracking perfection.

TEK SERIES 1.0 GPS TRACKING & TRAINING SYSTEM

PRODUCT INFORMATION

The compact TEK Series 1.0 GPS Tracking & Training System combines two collar modules (GPS collar and electronic remote training collar) which fit together on a single collar strap.

Train with static, vibration or tone stimulation whilst keeping track of your dog up to a distance of 11 km. The lightweight Handheld Device, with electronic compass, controls and tracks the location and speed of up to 12 collars* at once with up to 20 hours continuous use. Each component is completely waterproof and submersible** with the GPS Collar and E-Collar Module featuring our renowned DRYTEK™ technology. So whether you want to keep control of a long chase, track where that chase is going – or both – the TEK 1.0 provides tracking and training versatility like never before.

TEK SERIES 1.0 GPS TRACKING SYSTEM

PRODUCT INFORMATION

The TEK Series 1.0 GPS Tracking System provides the same GPS functionality as the Tracking and Training System. The compact and lightweight Handheld Device provides an instant fix on the location and speed of up to 12 dogs* up to a distance of 11 km. The Handheld Device has a backlit liquid crystal display, is scalable up to 120 km in diameter, and provides multiple-waypoint capabilities. It also alerts the user if their dog is on point or treed. Both the GPS Collar and Handheld Device are completely waterproof and submersible*** with the GPS Collar featuring our renowned DRYTEK™ technology. With a 2 hour charge for a minimum of 20 hours continuous use, you're always on the hunt when you track with TEK.

*Additional collars available for separate purchase ** GPS Collar: Waterproof and Submersible to 7.6 m per NEMA 6P and IP67 standards. Handheld Device: Waterproof and Submersible to 1.5 m

SPORTRHUNTER™ 1600 M MULTI-DOG REMOTE TRAINER

PRODUCT INFORMATION

With the introduction of the new SportHunter™ model, specifically designed for controlling tracking and trailing dogs, you keep the thrill of the chase within your control

The system is ideal for hunters who pursue deer and wild boar with multiple dogs. The compact transmitter features 6 colour-coded indicators that correspond with available SportDOG® collar strap colours so you instantly know to which dog in your pack you are sending static, vibration, or tone stimulation signals.

Choose from 12 operational modes to use the SportHunter™ with 2, 3, or 6 dog packs and never lose the option of vibration or tone in each mode. Up to 14 levels of static stimulation and 2 stimulation ranges (low/medium) allow you to customise stimulation levels for each of your dogs. With a range of up to 1600 metres, keeping control of a long-range pursuit is easier than ever.

SPORTTRAINER® 1600 M REMOTE TRAINER WITH BEEPER

PRODUCT INFORMATION

Introducing flexible training with instant dog location

The SportTrainer® Remote Trainer with Beeper offers ultimate control and flexibility at your fingertips. The Remote Transmitter controls the compact Receiver Collar and at the same time remotely operates a rugged beeper up to a 1600 m range. Designed for keeping up with pointing dogs in the field, the entire system is waterproof and submersible.*

Audible up to 450 m, the Remote Beeper has 9 distinct tones from which to choose. Set the Run Mode to beep every 5 or 10 seconds or locate your dog with a push of the Remote Transmitter button. The system is fully customisable, allowing you to set up to 2 or more Remote Transmitters to control the same Remote Beeper and Receiver Collar.

The remote training system has 3 static stimulation ranges (low, medium and high) with 7 levels of stimulation offered in each level. You can also train using vibration or tone stimulation for up to 3 dogs – all stimulation options are available whether running 1, 2, or 3 dogs. SportDOG® Add-A-Dog® and Add-A-Beeper™ are available to expand your system.

SPORTTRAINER® 1600 M REMOTE TRAINER

PRODUCT INFORMATION

Train up to 6 dogs with confidence over any distance

The SportDOG® SportTrainer® SD-1825E has been proven safe, comfortable and effective for all dogs over 3.6 kg. Consistent, correct use of this product allows you to reinforce commands and correct misbehaviour from up to 1600 m. The waterproof* Remote Transmitter sends a signal, activating the waterproof* Receiver Collar to deliver a harmless static stimulation.

With proper training, a dog will learn to associate this signal with a command. In addition it provides you with the option to send tone or vibration stimulation signals to the Receiver Collar and the ability to control up to 6 collars (purchased separately) at distances of up to 1600 m.

The SportTrainer® SD-1825E can be easily expanded to control up to 6 dogs by adding SportDOG® Add-A-Dog® collars. The system is also fully customisable, allowing you the flexibility to set 2 or more Remote Transmitters to control the same Receiver Collar.

* Waterproof and Submersible to 7.6 m per NEMA 6P and IP67 standards

Provides correction and communication versatility to suit you and your dog

The SportTrainer® SD-1225E compact waterproof* Remote Transmitter offers up to 16 stimulus levels and a choice of continuous or momentary static stimulation, which with proper training, a dog will learn to associate with a command. In addition, you have the option to send tone or vibration stimulation signals to the Receiver Collar and the ability to control a second or third collar (purchased separately) at distances of up to 1200 m.

The lightweight, waterproof* Receiver Collar features a slim-profile and contoured shape that ensures custom fit on your dog's neck. Users can select from 8 levels each within low, medium or high static stimulation settings on the compact Receiver Collar. No matter what style of training you prefer, this system can provide it.

* Waterproof and Submersible to 7.6 m per NEMA 6P and IP67 standards

3 Year
Warranty

PRODUCT INFORMATION

Upgraded technology in our most compact Receiver Collar

The SportTrainer® 700 m and 450 m electronic remote training collars from SportDOG® Brand excel in all environments and are especially suited to upland and multi-dog hunting situations. The palm-of-the-hand sized models are designed for field training and hunting with close-working dogs and feature waterproof/submersible* Remote Transmitters and Receiver Collars.

The remote training collars offer up to 7 levels of continuous and momentary static stimulation. Vibration and tone-only stimulation options are instantly available in every mode of operation. With SportDOG® Add-A-Dog® extra Receiver Collars, these systems can easily be expanded to control up to 3 dogs, even without losing the vibration and tone stimulation options for each dog. Low battery indication and a 2 hour recharge time for both the transmitter and receiver means the SportTrainer® systems are always ready for a training session or hunt.

* Waterproof and Submersible to 7.6 m per NEMA 6P and IP67 standards

BEEPER LOCATOR

3 Year
Warranty

PRODUCT INFORMATION

Easy to use beeper

The SportDOG® Beeper Locator is audible up to 400 metres. Three selectable Run Modes let you choose how often the Beeper Locator sounds off - silent/on-point, 5 seconds/on-point, and 10 seconds/on-point - and 4 selectable tones offer more flexibility.

The Beeper Locator easily fits most dog collar straps, either by itself or with a training collar. The 3-volt lithium battery provides hundreds of hours "on" time and the battery check feature means you won't get caught off guard.

With a generous sound range and waterproof casing, this lightweight dog beeper is a must-have in the field.

BARK CONTROL

SportDOG® Brand Bark Control incorporates Perfect Bark™ - a technology which provides firm, fair and consistent bark control.

Perfect Bark™ means that collars must detect both vibration and sound to trigger a stimulation - meaning that only the dog's bark will activate the stimulation, eliminating the risk of false stimulation because of environmental noises or another dog's bark. Safe and effective for dogs over 3.6 kg.

Next 

NOBARK™ 18 BARK COLLAR

PRODUCT INFORMATION

Perfect Bark™ technology deters only your dog's bark - no exceptions

The NoBark™ 18 by SportDOG® is designed to safely and consistently stop your dog's nuisance barking.

This Bark Control Collar includes 18 levels of static stimulation that adjust automatically - just turn the battery to the on position, select the stimulation range best for your dog's temperament, and put the bark collar on your dog. An automatic safety shut-off eliminates the risk of over-correction. The waterproof Bark Control unit includes a long-life replaceable lithium battery and an adjustable collar.

SBC-18E

NOBARK™ 10R RECHARGEABLE BARK CONTROL

PRODUCT INFORMATION

Your toughest barking challenge has met his match

The SportDOG® NoBark™ 10R collar lets you customise the type of bark control that works best for your dog. This waterproof Bark Control collar includes 10 levels of static stimulation and 3 training modes: Temperament Learning, Progressive Correction or User-Selected Correction. Automatic safety shut-off eliminates the risk of over-correction. Hear the quiet?
