

3D Tiles

● 3D Tiles S-5.37
in Civic

● KPMG,
New Zealand

Acoustic typography

Equal parts form and function, 3D Tiles are lightweight, sculptural acoustic tiles designed for interior wall application. 3D Tiles are made from 100% polyester fibre, moulded into abstract, three dimensional shapes that provide acoustic absorption across the mid to high frequency range. As both a focal point and a complementary piece, 3D Tiles feel equally at home in commercial, retail, education, and hospitality spaces.

Customisation

As creators and innovators, we understand your pursuit of the bold and unusual, the rare and exceptional—the brave, colour-outside-the-lines ideas. Every space you design is unique, therefore, every element—from floor to ceiling—should be tailored to fit. Our customisation tools offer unique avenues for creative expression to help you achieve your vision—all that's left to explore are the boundaries of your imagination.

Our customisation capabilities include Print, Etch™, Groove, Precision Cut, Mould and Press, and Peel 'n' Stick.

● Custom 3D Tiles in Silver, Stonewash and Charcoal

● Dreamworks Exhibition, Te Papa, New Zealand

Caring for the environment

3D Tiles are manufactured using 100% polyester fibre and contain a minimum of 55% recycled fibre (from PET plastics). Our products are designed to be recycled at the end of their life too.

We have continual improvement programmes in which we implement a range of initiatives to mitigate the environmental 'hotspots' that we have identified. Our products are GreenRate Level A, Health Product Declaration (HPD), and CDHP Standard certified.

3D Tiles are DeclareSM certified to be Red List free and can be used in Living Building Challenge projects. Autex has a high functioning Environmental Management System (ISO 14001) to enhance our environmental performance and contribute to sustainable development.

Declare.
