

HOW TO ASSEMBLE

THE ALDAMA CHAIR

These beauties can be put together in four quick steps.

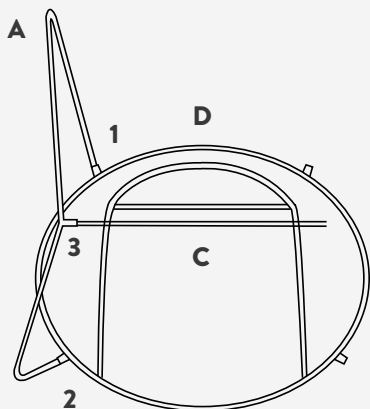

So get that bottle of wine ready because it won't be long before you're sitting pretty in your new chair. Just follow the guide on the back of this card, and you'll be good to go.

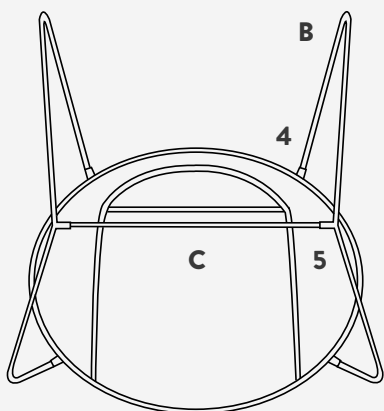

First, get familiar with all of the pieces you'll need – you should have received two legs (A&B), a steel post (C), a seat (D), a hex wrench (E), and twelve screws (F). Lay everything on the floor, like the diagram above. Trust us, this will make the whole process a lot easier.

STEP 1

STEP 2 & 3

STEP 4

STEP 1

LEFT LEG TO SEAT & POST

Take the left leg (A) and place the long side in hole (1) of the seat (D). Then, place the short side of leg (A) in hole (2). Next, slide post (C) into hole (3).

STEP 2

RIGHT LEG TO BACK OF SEAT

Place the long side of right leg (B) in hole (4) on the seat.

STEP 3

RIGHT LEG TO POST

Grab the right leg (B) at the center and slide hole (5) onto the post (C). Use screws to secure post (C) in place.

STEP 4

RIGHT LEG TO FRONT OF SEAT

Now, connect the short side of the right leg (B) with hole (6) of the seat and slide it in place. Flip the chair over and test it out to see if the legs are even. If not, just shift the legs until they are the same height. Finally, use the hex wrench (E) to secure the screws (F) in each hole.

And there you go! Now, sit back and enjoy that glass of wine.
