

## HOW TO HANG YOUR WALL HANGING

Your package includes 2 screws, 2 wall anchors, 1 wall hanging, wood rod, and 2 wood hanger bases. You will need to grab a ruler/measuring tape, level, power drill and a pencil to get started.

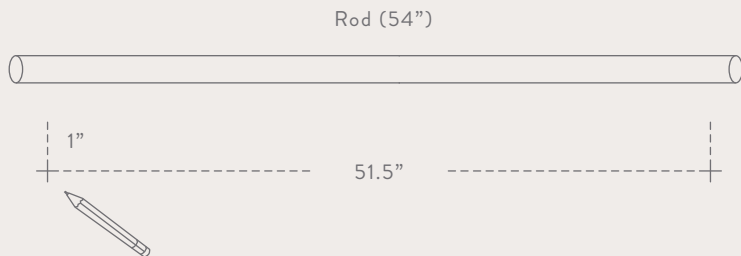

### STEP-BY-STEP

#### STEP 1: FIND THE PERFECT PLACEMENT

Grab a friend to help hold the wall hanging up by the rod to find the perfect placement. No need to hold the 2 base pieces up yet.

#### STEP 2: MARK HANGING ROD ENDS

After finding the perfect spot, make two level marks 51.5" apart at your desired height. Then make a small pencil mark 1" directly below these marks on each side.

## STEP-BY-STEP CONTINUED

### STEP 3: PREP TO MOUNT THE BASES

Drill a 1/16" pilot hole followed by a 1/4" drill bit. Hammer wall anchors into the wall until the tops are flush with the wall, then drill screws into anchors until the head is 1/4" out from the wall.

### STEP 4: HANG YOUR WALL HANGING

Slot the wood hanger bases onto the screws and slide down to secure. Then place the wall hanging on the wood rod onto the bases. Enjoy!
