

HOW TO HANG YOUR MIRROR

Your package includes the mirror, a screw, and an anchor. (If you ordered one of our mirror sets, you'll also find a marble hook and an extra screw and anchor). To hang this beauty, you will also need to grab a drill, hammer, and level.

STEP 1: "X" MARKS THE SPOT

First, hold the mirror where you'd like to hang it. At the top of the mirror, use a pencil to mark the center point on the wall.

Now, take the mirror down and measure the distance from the top of the mirror to the mounting hole on the back. Then, go back to your first mark and measure down the same distance and make another pencil mark - this will be your final drill point.

STEP 2: TIME TO DRILL

Determine if you are drilling into a wall stud. If so, use a 3/32" drill bit to make a hole on your mark. Drill at a 90-degree angle for best results. Then, drill the provided screw into the hole. Remember to leave 1/4 of screw exposed.

If you are not drilling into a stud, you'll need to use the anchor provided. Use a 1/4" drill bit to create the hole and carefully hammer the anchor into it until it is flush. Finally, drill the screw straight into the anchor. Leave 1/4 of screw exposed.

STEP 3: HANG IT UP

Align the hole on the back of the mirror with the exposed screw. Use your level to make sure it's straight.

STEP 1: “X” MARKS THE SPOT

Now that your mirror is secure, hold up the leather strap flush against the wall. Make a pencil mark 1/2” below the top of the leather strap.

STEP 2: TIME TO DRILL

Determine if you are drilling into a wall stud. If so, use a 3/32” drill bit to make a hole on your mark. Drill at 90-degree angle for best results. Then, screw the marble hook directly into the wall by hand.

If you are not drilling into a stud, you’ll need to use the anchor provided. Use a 1/4” drill bit to create the hole and carefully hammer the anchor into it until it is flush. Then, screw the marble hook into the anchor by hand.

STEP 3: SECURE THE STRAP

Hang the leather strap over the marble hook, and voila! You’re done.
