

TECHNICAL DATA SHEET

SMASH DEGREASER

SMASH is far more effective and economical than other degreasers on the market today. This revolutionary blend of surfactants, detergents, and water soluble solvents gives new meaning to the term "all purpose cleaner, degreaser". Emulsifies the toughest, most stubborn, greasy soils faster than the best "butyl" based products available. Designed especially for the hardest cleaning jobs you will encounter. Its unique ability to hold soils in suspension after emulsification makes it rinse much easier than conventional degreaser formulas.

DIRECTIONS

Suggested dilutions may be exceeded and still result in satisfactory results on a case by case basis. Do not allow to dry on glass.

DILUTE WITH WATER: For General Cleaning —

- Light Duty as high as 1:128 (1 oz./gal.)
- Medium Duty 1:20 (6 oz./gal.)
- Heavy Duty 1:10 (13 oz./gal.)

Extremely Versatile: SMASH should be diluted with water to the desired strength for the job. Apply by spraying, wiping, brushing, dipping, or soaking.

Kitchens: Use diluted with water form 1:5 to 1:20 on floors, walls, countertops, ovens, grills, and air filters.

General Cleaning: Dilute from 1:20 to 1:60 for tile floors, painted walls, carpet and upholstery spotting, vinyl, leatherette, plastic, porcelain, ceramic, boats, woodwork, and painted exterior siding.

For Engine Degreasing and as a Parts Wash: Dilute 1:1. Brush or spray onto surface, allow to penetrate soil, then rinse thoroughly with clear water.

For Tar and Asphalt Removal: Spray or mop undiluted on soiled surface. Wipe or brush as necessary so all soil is emulsified. Rinse thoroughly. Do not allow to dry on surface.

May also be used in high pressure spray equipment and automatic floor scrubbers.

Not intended for use as a glass cleaner. Do not allow to dry on glass.

ADVANTAGES

- Superior "non-butyl" formula is completely water soluble. Easily mixed by hand or automatic metering system.
- Unique soil suspension property guarantees easy rinsability. Leaves no film when job is finished.
- Non-flammable. Contains no petroleum distillates.
- Highly concentrated. Use at dilutions from 1:1 to 1:128 with water depending on soil conditions.
- Lemon scented. Gives pleasant fresh fragrance during use.

SPECIFICATIONS

Physical Form	Clear Liquid
Color	Yellow-Green
Scent	Lemon
Specific Gravity	1.04
Foam Test 1% Solution	Initial - 40 mm 5 minutes - 35 mm
pH As Is	12.5
pH 2%	11.8
Active Alkalinity	1.2%
Total Alkalinity	2.83%
Total Solids	6.0%

WARNING:
Causes skin irritation.
Causes eye irritation.
Keep out of reach of children.

SHIPPING WEIGHT IN POUNDS:

Case 4 Plastic Gallons	36.3 pounds
5 Gallon Plastic Pail	45.1 pounds
