STRENGTHENS
HAIR

No matter how gentle your chemical process is, it always damages the hair and breaks internal bonds. This can leave the hair dry, brittle and ultimately weak.

NEO BOND 3 step in-salon professional system with home maintenance can be used in combination with all chemical services to prevent damage before it even begins.

▼ 1 BOND REPLICATOR

NEO BOND 1 Bond Replicator added to the chemical service mixture creates new bonds while protecting the existing internal structure. It improves hair strength and elasticity.

▼ 2 BOND FORTIFIER

NEO BOND 2 Bond Fortifier cream fortifies and crosslinks the bonds while delivering and adding hydration and nourishment to the hair.

▼ 3 HAIR PROTECTOR

NEO BOND 3 Hair Protector is a weekly home treatment that sustains and maintains in salon service while delivering emollients to enhance elasticity, strengthen the hair and provide a brilliant polished shine.
