13/5/2020

Dear Cookie and Mandy,

A belated thank you for the "vein finder" that you so kindly donated to our clinic late in 2018/early in 2019.

Finding veins in our young patients, as you surely remember, is often very difficult, and the "vein-finder", has certainly made the procedure, MUCH MUCH easier- and far less stressful for patients, doctors and parents alike

Thank you so so much for providing us with the 'vein-finder', from myself and from all the children at the CF clinic. We SO SO appreciate it

I so often think of ALL of you, your bravery, and your special way of KEEPING JODI's memory alive, with your jewellery and the COJI range, and how you so willingly donate much needed items to the clinic and monetary donations to the CF association, so that staff members NOT employed by the province can be funded.

Each time I look at the 'lung-function' machine, and the "vein-finder", I think and talk about you all, and tell all the younger doctors, how come our clinic was privileged to be the first in the hospital, to have acquired the much sought after machine (other departments are now lucky enough to have finally also received machines now)

I often think about your CCCCCRAAZY JODI, her nonsense, her joy for life, and how on her dying day, she was still partying, issuing instructions, eating pizza and pasta, and having a RAZZLE in ICU. Whew, what a GAL !!!!

Keep up your amazing work
