

ARCH® CUPLUS™

LONG LASTING ANTIBACTERIAL TECHNOLOGY

ARCH® CUPLUS™ technology uses advanced technology to infuse polymers with active particles made from EPA approved Copper Oxide Powder (EPA Reg. No. 92029-1), it prevents the growth of odor-causing bacterial at the source. As the next generation of copper antibacterial technology, CUPLUS™ provides consumers with more effective and safer, long-lasting protection.

Compared to current products on the market, CUPLUS™ technology presents many clear advantages in function and performance.

IMPORTANT NOTICE: ARCH® CUPLUS™ IS NOT NANOCOPPER AND ONLY ACTIVE ON THE TEXTILES ITSELF.

Sportswear, socks, outdoor apparel and bedding made of CUPLUS™ fibers deliver more comprehensive functions.

CUPLUS™ fibers can be blended with both natural and synthetic fibers such as cotton, wool, bamboo, modal, and Tencel.

95% of the raw materials in the fibers made by CUPLUS™ ECO technology come from recycled items. We are converting plastic bottles and other recyclable materials into fibers through six processes.

BENEFIT

Antibacterial

Permanent&natural Antibacterial Technology

Odor Reduction

Remove And Reduce Odor

Copper Infused

Fiber Infused With Copper Powder

UPF 50+

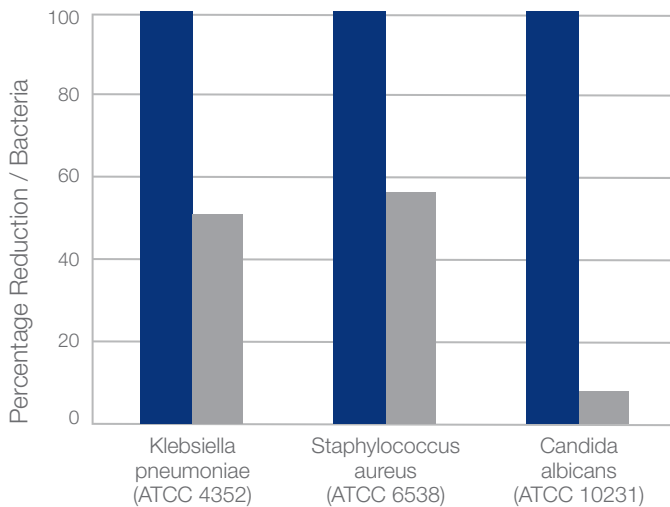

Excellent UV Protection

ARCH® CUPLUS™

LONG LASTING ANTIBACTERIAL TECHNOLOGY

COMPARISON OF ANTIBACTERIAL PERFORMANCE ARCH® CUPLUS™ VS. CHEMICAL TREATMENT

TEST METHOD AATCC 100-2012

- Fabric made with 30% ARCH® CUPLUS™ fiber, has been washed 50 times
- Fabric treated with antibacterial chemicals, has been washed 20 times

PERFORMANCE. ENHANCED.®

Established over a decade ago in Shanghai, China, ARCH is a global company which strives to Create A Better Future™ through our vast portfolio of hi-tech textiles. Our expertise in producing leading performance driven fabric stems from our understanding of the intricacies within fabric, from fiber to yarn construction, dyeing, spinning and weaving. This knowledge coupled with our advanced skills in creating innovative techniques and finishes for our fabrics, ensures that we are at the forefront of the textile industry. Here at ARCH, we not only produce your premium PERFORMANCE. ENHANCED.® textiles, but the lifestyle to match.
