

SAVMOR

Conserve Water, Save Energy

## COLORED YARNS

SAVMOR™ technology provides a solution dyed, uniquely colored yarn in which the dye becomes part of the fiber during the extrusion process. Omitting the need for bath dyeing allows SAVMOR™ to conserve both water and energy.

## APPLICATIONS

Apparel

Accessories

Intimate Apparel

Hosiery

Footwear

Bags

Industrial

Home Textiles

## BENEFITS:

- Conserves water and energy
- Richly colored
- Super-brilliant color uniformity
- Inherently colorfast, durable, bleach-resistant&UV light fast
- Precise custom mixing provides enhanced capability to match colors
- Many pigments from naturally occurring or organic materials
- Combines well with other performance technologies

## AVAILABLE:

- In a full range of SAVMOR™ yarns, including filament, spun polyester yarn and heather combinations
- With custom colors for larger orders and smaller lots for specific applications

ARCH

SUSTAINABILITY. ENHANCED.
