

# BONAFIDE®

## LEADING SCIENCE IN BONE INTEGRITY

BONAFIDE® contains Quinacuanone®, a patented, water soluble and bioavailable form of Vitamin K1 and K2.

Vitamin K1 & K2 have a critical effect on the function of osteocalcin, the bone protein that binds mineral and protein in the bone together.

# BONAFIDE®

## LEADING SCIENCE IN BONE INTEGRITY

Bonafide® contains Quinaquanone®, a patented and bioavailable form of Vitamin K1 and K2.

Vitamin K1 & K2 have a critical effect on the function of osteocalcin, the bone protein that binds mineral and protein in the bone together. Without sufficient Vitamin K the binding process is incomplete and low density or defective bone and cartilage are produced.

Vitamin K1 & K2 are naturally available in fresh, growing, green pasture but they are highly unstable, being degraded by UV light, wilting or "wintering off". Horses that do not have constant access to high quality pasture are likely deficient in Vitamin K, leading to a reduction in bone density and strength. Horses removed from Vitamin K rich pasture and brought into a box/yard regime have demonstrated a reduction in bone density within 7-10 days.

### Active Ingredients.

Each 10g (0.35 Oz) Contains:  
Quinaquanone® (Vitamins K1 & K2) 7mg  
Vitamin D3 (Cholecalciferol) 8,000 IU

### Inactive Ingredients.

Each 10g (0.35 Oz) Contains:  
Sucrose Microfine 9.33g  
Corn Starch 0.49g

### Proudly Australian Made

### Directions for use.

#### Feed rates, as a guide.

Recommended as below per day with food.

Horses stabled or with diminished access to pasture:  
10g (0.35oz) per 500kg (1100lb) bodyweight per day.

Foals & Weanlings: 10g (0.35oz) per 200kg  
(440lb) bodyweight per day.

Yearlings & 2 year olds: 10g (0.35oz) per 400kg  
(882lb) bodyweight per day.

Pregnant & Lactating Mares: 10g (0.35oz) per 500kg  
(1100lb) bodyweight per day.

Large end level scoop holds 10g (0.35oz); small end  
level scoop holds 3g (0.11oz).
