

GLEAM®

RAPID HOOF AND COAT CONDITIONER

Elevated levels of Biotin, Methionine & Zinc

Supports growth of strong hooves

Improves skin condition & coat shine

GLEAM®

RAPID HOOF AND COAT CONDITIONER

Hygain Gleam® incorporates Keratin components to promote the development of strong hooves, healthy skin and a glistening coat.

Biotin is a B Group Vitamin understood to support cell proliferation and growth. Deficiency in biotin has been shown to result in poor quality hoof, skin and coat.

Methionine is an essential amino acid, required for the production of keratin. Keratin is the major protein component of the hoof wall and horse hair.

Zinc is a trace mineral that plays a role in skin, hoof and coat health. Enzymes involved in keratin production depend on Zinc to function. Decreased Zinc in the diet has been associated with decreased hoof strength and hardness.

GUARANTEED ANALYSIS:

ACTIVE CONSTITUENTS PER 40g DOSE

Biotin	20mg
Methionine	5,000mg
Zinc	200mg
Full Fat Soybean Meal	34g

Directions for use.

Daily Dosage:

Hoof & General Coat Condition: 40g

Rapid Coat Condition: 60g

Proudly Australian Made
