

HOOFGAIN®

**SETTING THE NUTRITIONAL STANDARD IN
HEALTHY HOOVES, SKIN AND COAT.**

A unique, pelleted blend of essential vitamins, minerals & fatty acids to support hoof integrity and coat condition.

Including: Biotin, Zinc, Methionine,
Vitamin A, D & E and Omega 3 fatty acids.

HOOFGAIN®

AN AID IN THE MAINTENANCE OF HOOF INTEGRITY

A blend of essential Vitamins, Minerals and Fatty Acids in a palatable formulation. Hygain Hoofgain® contains:

Biotin: A vital co-enzyme assisting in the formation of Keratin from key amino acids.

Methionine: A primary sulphur bearing amino acid that along with cysteine (which Methionine can synthesize) is an essential component of Keratin. Methionine must be provided in increased levels where hoof growth is desired.

Zinc: Key mineral in hoof and coat health. Hoof quality will often suffer where zinc supply is marginal.

Vitamin A: One of the carotenoids essential to all keratinized tissue. Supplementation is particularly essential for horses not on high quality, fresh pasture.

Vitamin E: Benefits of Vitamin E as an antioxidant are well documented and is also an essential nutrient for renewal of keratin.

Omega 3 Fatty Acids: Essential nutrient in the formation of supple and strong membranes including hoof wall microtubules and laminae.

Iodine: Deficiency in this mineral often causes poor coat and hoof quality.

Guaranteed Analysis.

Vitamin A (min) 125,000 IU,
Vitamin D3 25,000 IU, Natural
Vitamin E (min) 5,000 IU,
Biotin (min) 250mg,
Zinc (min) 6,667mg, Iodine
(min) 33.3 mg,
Methionine (min) 50g,
Omega-3 oil (min) 9.16g.

Directions for use.

Feed, as a guide:

120g (4.23oz) or 2 scoops per 500kg (1100lb)
bodyweight per day.

The scoop supplied holds approximately 60g (2.12oz).

Ingredients.

Alfafa (Lucerne) meal, vegetable oil, vitamin A, vitamin E,
methionine, biotin, zinc & iodine.

Proudly Australian Made
