

RE-LYTE®

**BLEND OF MINERAL SALTS TO REPLENISH
ELECTROLYTES LOST DURING RACING OR
STRENUOUS EXERCISE**

Mineral Salt formula closely matches
horse's sweat

Helps to rehydrate

Helps restore electrolyte balance

RE-LYTE®

**BLEND OF MINERAL SALTS TO REPLENISH
ELECTROLYTES LOST DURING RACING
OR STRENUOUS EXERCISE**

Electrolytes are an important part of the horses diet and are needed by the horse daily to regulate the correct acid base balance to prevent dehydration, and for proper nerve and muscle function.

Imbalances in electrolytes can affect performance, feed intake, muscle and heart function and bring on early fatigue.

Re-Lyte® provides the correct balance of electrolytes in a high quality bioavailable, easily absorbed formula.

Active Ingredients, per kg:

Sodium 269g, Potassium 112g,
Magnesium 40g, Chloride 433g,
Riboflavin 1,000mg,
Thiamine 1,500mg, Calcium 11.7g
