

## SWEAT-UP™

TO AID IN THE RESTORATION OF  
NATURAL SWEATING & BREATHING

Formulated for horses with non-sweating,  
the puffs & dry-coat conditions

Helps induce thirst

# SWEAT-UP™

## TO AID IN THE RESTORATION OF NATURAL SWEATING & BREATHING

Anhidrosis, or non-sweating, is a condition affecting thousands of horses world-wide. Symptoms are (to varying extents) a combination of a high respiration rate, poor or absent sweating, dull coat, scaly skin & crumbly, brittle hooves.

Sweat-Up™ is a scientifically based formulation of electrolytes, minerals and Omega 3 fatty acids. The unique formula provides sufficient electrolytes to help induce thirst, and a strong zinc supplement which is immune to absorption interference by calcium and other divalent (2+) metals.

### Ingredients.

Sodium, Potassium, Phosphate, Chloride, Magnesium, Omega 3 Fatty Acids, Organic Zinc and Iodine.

### Proudly Australian Made

p. (03) 5943 2255  
e. [info@hygaingroup.com](mailto:info@hygaingroup.com)

### Directions for use.

**Dosage, as a guide** 30g (1oz) or one level scoop morning and night.

Short-term sufferers should respond in 4-7 days, chronic cases may take up to 3 weeks.

Susceptible horses should remain on SWEAT-UP while in a hot climate.

### Guaranteed Analysis, per kg:

Sodium ions 116.7g - 121.5g, Potassium ions 13.24g, Phosphate ions 19.2g, Chloride ions 177.3 - 184.5g, Magnesium ions 34.05g, Omega 3 fatty acids 4.08g, Zinc 270mg.
