PLANT CONSULTATION

# Green Your Space

If you are a business owner, architect or buyer and are looking to create that oasis or jungle to your space or brand please do get in touch.

We work with the best growers and nurseries in the UK and Europe and can supply real, preserved and faux plants.

We also supply Hydroponic Plants which means the cultivation of plants in water rather than soil. These plants are widely used in offices and other business premises because the care is so easy.

The key advantage of hydroponic cultivation is that it allows water and nutrients to be applied in just the right quantities. Our perfectly fitting planter inserts mean that you can make the planter watertight, while the water meter enables you to check the water level in your planter with complete accuracy, so that you can easily add just the right amount of water.

FLOWERS FOR YOUR BUSINESS

# Floral Design

We create impactful and unique designs that will enhance your space, our design team will carefully listen to your requirements and will offer a bespoke solution.

Our modern techniques include floral design, kokedama, moss displays and terrariums - making your space as unique as your company.

CORPORATE GIFTS

# For your colleagues & clients

Build the strength of your company or brand. We can build bespoke packages which includes floral arrangements, plants, terrariums and gift cards.

Give new employees a green welcome or gift cards for loyal staff? We can even white label products if required.

TEAM BUILDING

# Motivational Workshops

We host seasonal, informal, relaxed and fun workshops within our beautiful shop or your own premises- leave with the knowledge to produce a botanical piece of art time and time again.

Workshops help with staff engagement, motivation and team bonding.

Our modern techniques includes floral design, kokedama, moss displays and terrarium creation.
