

PIGNX®

Bio-Repellent Bird Gel

PIGNX BIO-REPELLENT BIRD GEL is an EPA-Registered, NSF-Certified, US-Patented, 100% non-toxic, all-weather, chemical-free, contact repellent gel that has been proven to deter pigeons and other unwanted birds from roosting on homes, apartments, hotels, office buildings, warehouses, factories, and other indoor and outdoor structures.

NEW INNOVATIVE TECHNOLOGY: Our biotechnology combines pharmaceutical-grade organic capsaicin, a natural component of hot chili peppers, with our proprietary clear, odorless, non-staining, weatherproof food-grade mineral oil gel that provides long-lasting protection from unwanted birds. Our gel's superior durability and adhesion allows application on almost any surface and in ANY climate no matter how hot, cold, wet or dusty.

HOW IT WORKS: Upon initial contact with PIGNX BIO-REPELLENT BIRD GEL, problem birds experience a sharp, but safe burning sensation. In most cases, this causes the affected birds to leave quickly and not return.

WHERE TO APPLY: Apply PIGNX BIO-REPELLENT BIRD GEL in areas that normally attract problem birds such as rooftops, ledges, heating & air-conditioning units, skylights, balconies, signs, billboards, etc.

HERE'S WHY YOU SHOULD BE USING PIGNX BIO-REPELLENT BIRD GEL... NOW!

- ✓ **EPA-Approved:** Thoroughly tested to be effective & consistent
- ✓ **NSF-Certified:** Safe for use around humans, animals & the environment
- ✓ **U.S. Patent-Protected:** 100% non-toxic, ultra-safe, food-grade mineral oil gel formula
