

**BIO-REPELLENT
BIRD GEL**

**OPTICAL
GEL**

The popular use of bird gel repellent dishes has cut the installation time in half and eliminated the need for messy caulking guns. Pre-filled gel dishes make unwanted bird problems much faster and easier to solve. But not all bird dishes are created equal and here's why PIGNX Bio-Repellent Bird Gel is the clear winner over its main competitor, Optical Gel:

PIGNX is EPA-Registered vs. Optical Gel is not EPA-Registered

- The EPA is recognized worldwide for its high standards of product quality, effectiveness, and safety.
- PIGNX: EPA-registration number 84418-1

PIGNX claims are laboratory-tested & verified by the EPA vs. Optical Gel claims are not

- The EPA verifies that PIGNX uses pharmaceutical-grade capsaicin which causes an uncomfortable tingling sensation when pigeons come in contact with the gel.
- Optical Gel's Unverified Claim #1: Birds fear the presence of fire when they see UV rays emitting from their gel. Our experts say that this is not true.
- Optical Gel's Unverified Claim #2: The scent of peppermint oil in their gel is an effective bird repellent when exposed to outdoor elements over a two-year period. Our experts claim that the scent fades quickly.

PIGNX is NSF-Certified vs. Optical Gel is not

- The National Sanitation Foundation certifies that PIGNX can be used safely in restaurants, supermarkets, convenience stores, hospitals, food storage rooms, and food processing areas without health risks.

PIGNX's gel formula is US-Patented vs. Optical Gel is not

- PIGNX's food-grade mineral oil gel is U.S. Patented and uniquely formulated to maintain its effectiveness in all weather conditions – hot, cold, wet or dusty.

PIGNX lasts twice as long as Optical Gel

- PIGNX stays highly potent for a full 5 years – Optical Gel lasts only 2 years
- EPA Storage & Stability Tests show that the active ingredient (capsaicin) in PIGNX becomes stronger with age in its patented mineral oil gel.

PIGNX costs 37% less than Optical Gel

- PIGNX retails for \$60 per case of 24 – Optical Gel retails for \$95 per case of 24.
- PIGNX dishes are larger and cover more area than Optical Gel dishes.

PIGNX is made in the USA vs. Optical Gel is not

- PIGNX is made in environmentally-stringent California - Optical Gel is made in Korea.

Buy PIGNX – It's a No-Brainer!
