RESTAURANT RAT & ROACH REPELLENT GEL

NSF-CERTIFIED

**INDUSTRIAL GRADE PESTICIDE
USED BY PROFESSIONAL EXTERMINATORS**

Restaurant Rat & Roach Repellent Gel is not a gimmick. It is an industrial-grade bio-pesticide used by professional exterminators worldwide to prevent rodent and cockroach problems in health-sensitive environments. Unlike other pest control repellents, our gel formula is EPA-Registered, NSF-Certified, and U.S. Patented.

- **AVOID COSTLY HEALTH DEPARTMENT VIOLATIONS** – Restaurant Rat & Roach Repellent Gel protects your restaurant's fine reputation from the negative results of health department inspections. A public health department citation alone can turn regular customers away forever.
- **SAVE MONEY ON MONTHLY MAINTENANCE SERVICE CONTRACTS** - Restaurant Rat & Roach Repellent Gel is easy to apply and can be performed with simple training by any cleanup personnel.
- **EFFECTIVE AGAINST MANY TYPES OF PESTS** - Prevents invasion of your food enterprise from mice, rats, raccoons, squirrels, opossum, ants, and cockroaches.
- **ALL-WEATHER U.S. PATENTED GEL FORMULA** - It's a powerful food-grade mineral oil gel formula that does not melt, drip or freeze under any conditions—no matter how hot, cold, wet or dusty.
- **CREATED BY PROFESSIONAL EXTERMINATORS** - Our product is NSF-Certified Safe, 100% non-toxic, and highly effective. It makes use of powerful pharmaceutical-grade capsaicin (chili pepper extract) that is safer than dangerous toxic pesticides and sends rodents & crawling insects away for good!
- **EXTRAORDINARY VALUE** – One caulking tube will protect your restaurant or professional kitchen with a single application that can last up to two years! Unlike "gimmicky" scented spray deterrents, our powerful professional-grade gel formula stays potent and effective for the entire time.
- **SATISFACTION GUARANTEED** - We stand by our products; we've perfected our formula through years of use by professional pest control operators worldwide and are confident that you will see outstanding results when our product is used as directed.
