ABOUT US

Kira Labs was founded in 2003 with a debut line of highly effective skin care products. Our success is driven by appealing design, value, and high quality, functional formulas that characterize all of our brands. Over the past 15 years our happy and repeat customers have helped grow Kira Labs into a leading marketer and manufacturer of beauty innovations featured in 10,000+ stores. All of our formulas are made in house by our expert chemists, and bottled and distributed from our own facility.

Giving Back to our Community

We believe in supporting our local communities. Medyskin has been donating Hand Sanitizers to various organizations during the COVID-19 pandemic such as the Veterans of America, Local First Responders, Nursing Homes, Hospitals, and public libraries. We also donate many of other branded products year-round to local organizations in our community to help those less fortunate.

INDUSTRY RECOGNITION
