

The lack of science, safety and credibility, for nutritional ingredients, are major concerns for consumers and with more and more Americans overweight or obese, there never has been a better time for finished goods marketers to introduce a weight management product to their customers that is based on sound science, diligent safety and dependable credibility – Introducing CQR-300®

- Proprietary, multi-patented dietary supplement extract CQR-300® from *Cissus quadrangularis*.
- Weight loss, weight management ingredient with 5 published clinical trials.
- Multiple international Gold Standard clinical trials, including Dexa placebo-controlled studies.
- Safe, effective and clinically studied to lose up to 4 times the weight compared to placebo.

PATENTED CISSUS QUADRANGULARIS EXTRACT

CQR-300® is a unique, patented (US patent 7,175,859, 8,318,213, 7,659,313, 7,695,742, 7,736,675, 7,718,200, 8,362,090 and patents pending) extract of *Cissus quadrangularis*. *Cissus quadrangularis* is an indigenous medicinal plant of India and West Africa. The use of this culinary plant for promoting fracture healing in India and rehydration in West Africa are old practices that were employed by traditional healers for centuries. CQR-300® contains standardized amounts of phytosterols as well as naturally occurring vitamin C, vitamin A and calcium.

SAFE, EFFECTIVE AND CLINICALLY STUDIED

In 2005, researchers, showed, *in vitro*, that CQR-300® has lipase inhibition, α -amylase inhibition, α -glucosidase inhibition and trypsin inhibition. This prompted the first ever human clinical trial for weight loss, heart health and blood sugar health to be conducted with CQR-30®. The results demonstrated CQR-300® reduced body weight (10.6 lbs), reduced BMI and increased lean muscle mass all in 6 weeks. Subsequently, 4 more human clinical trials we conducted on CQR-300® totaling over 300 patients including a multi-centered Dexa study. Once again, the results proved to be consistent and some cases better than the original 6-week study.

MULTIPLE MECHANISMS OF ACTIONS

- Dietary carbohydrate and fat blocking mechanisms
- Lipase inhibition – blocks fat digesting enzymes
- Amylase inhibition = blocks carbohydrate digesting enzymes
- Promotes emotional well being and reduces emotional over eating

RECOMMENDED DOSAGE

The recommended adult daily dosage is 300 milligrams of CQR-300®

STRUCTURE/FUNCTION CLAIM AREAS

1. Weight Loss/Weight Management*
2. Satiety/Appetite Control*
3. Mood Enhancement/Emotional Eating*
4. Cardiovascular Health*
5. Metabolic Balance/Metabolic Wellness
