

GASTRONORM PANS

Superior quality was our focus when it came to developing our 3inox range of gastronorm food pans. Using European Grade 18-8 / 18-10 Stainless Steel, our heavy gauge pans are manufactured using 0.7mm and 0.8mm base material.

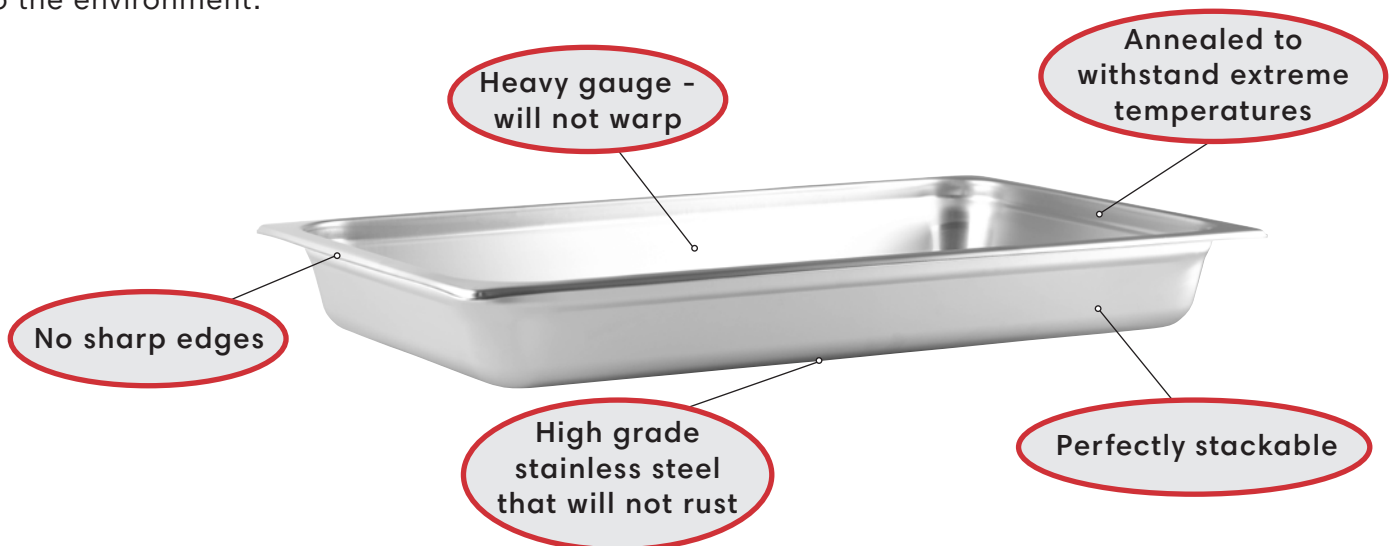

Manufactured of the highest quality materials and featuring anti-jam functionality along with unsurpassed strength and durability, each pan has been annealed to withstand blast-freezing, high heat and Combi oven use. The pans were designed to be the leading range within the hospitality industry.

Green Production

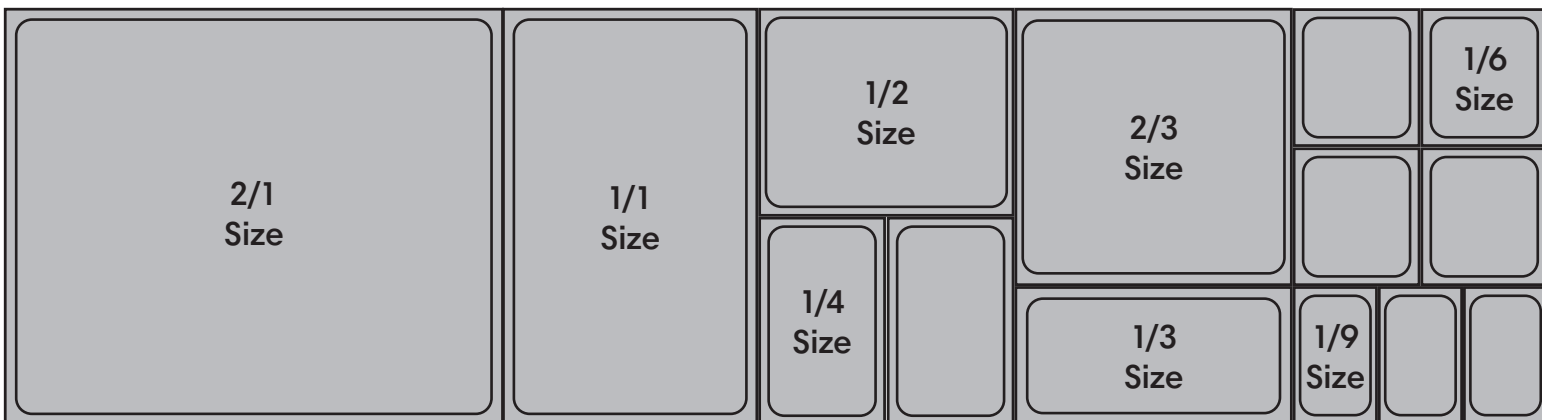

Our factory has over 40+ years of experience manufacturing premium quality stainless steel products. By utilising the highest quality stainless steel we have been able to remove the normal practice of polishing and buffing necessitated by others in production to achieve the high quality finish obtained in our product.

The combination of high grade materials and our production expertise in the 3inox manufacturing process leads to better working conditions, less pollutants and a natural finish to our product which in turn reduces our manufacturing footprint and makes a positive contribution to the environment.
