

# 1 MEYLE-HD control arm to replace 3 OE versions!

Innovative and reinforced design for the new BMW 5, 6 and 7 series

When developing MEYLE-HD spare parts our engineers have only one goal in mind: creating automotive parts which outshine the original in terms of durability and service life.

With the new MEYLE-HD control arm for the BMW 5, 6 and 7 Series we take service quality to yet a higher level. Thanks to the pioneering design our control arm

is able to replace three different OE versions by one single component.

No more need to stock triple inventories. No more faulty deliveries – no matter which application is to be replaced. This saves you precious time and money! Be a pioneer yourself and take your business to higher level, too!

## The new MEYLE-HD control arm offers a wide range of benefits:

- > Ball joint (316 010 0014) which can be replaced individually, only available from MEYLE-HD
- > Ball joint with anti-corrosion finish and innovative socket made from highly wear-resistant plastic material
- > Reinforced bushings (314 610 0008/HD)
- > One control arm to replace its three OE equivalents: Clear marking of adjustment possibilities
