

Apollo RGB Controller Manual

Basic Parameters

- 358 Colored Effects
- Remote Control Distance: 0-30 metre range
- Batteries Required: 2 x AAA

Operational Instructions

■ : Power On/Off

○ : Pause Button (pauses the currently playing effect). Select a color from the color ring and then press this button again to begin playing the different effects on Autoplay

Color Ring:

Tapping a color on this ring will change your lamp's color to correspond to the color chosen.

M+ : Mode Plus, takes you to the next effect

M- : Mode Minus, takes you to the previous effect

S+ : Increase the speed of the colored effects (they will move faster)

S- : Decrease the speed of the colored effects (they will move slower)

B+ : Increase brightness of the lamp

B- : Decrease brightness of the lamp

Pairing Instructions

By default, a single remote can control multiple Apollo RGB Floor Lamps. In order to establish a pairing between the remote and specific lamp(s), you will need to only turn on the specific lamp(s) which you wish the remote to control. After doing so, long-press the blue key at the top of the color wheel for 5 seconds. The lamp should flash 3 times, indicating that the pairing has been successful.

Reprogramming Instructions

In the case that your remote control no longer changes any colors of the lamp, you will need to reset the pairing connection between the two. Long-press the yellow key at the bottom of the color wheel for 5 seconds. The lamp should flash 3 times, indicating that they have paired successfully.
