Vest	10 years
Booster	7 years

Ridesafer® products are certified for use in motor vehicles under US FMVSS 213, China Compulsory Certification, Korean KCL and permitted in Canada CMVSS 213.3

The Ride Safer™ Delight Travel Vests use a revolutionary new technology to increase safety for the young traveler by optimizing the adult seat belt fit for the small child's body. The front panels use energy absorbing materials to dissipate and absorb crash forces while the guides hold the seat belt correctly in place.

Weighing a small fraction of a conventional car seat, the Ride Safer™ Travel Vests are approved to use for children who weigh between 30 to 110 lbs. (15kg and 36kg.)

Three sizes are available in 4 colors.

Ride Safer™ vests are much easier to travel with than conventional child seats. They can easily fit into a suitcase or child's backpack. They are so compact that multiple children can fit comfortably onto the back seat of a small automobile or next to a bulky car seat.

The vests are crash tested for safety and are certified according to US FMVSS 213 test procedures as a harness. They are legal to use in all US states and in all countries that recognize US Federal Motor Vehicle Safety Standards. They also hold compliance certification under China Compulsory Certification, Korean KCL and are permitted in Canada as CMVSS 213.3 custom restraints.

Ride Safer™ vests are lightweight and portable. Easily stored in a small bag or case, they are the ideal travel solution.

Ride Safer™ vests contain no plastics. All components are recyclable. Travel Smarter™ boosters are made of recyclable EPP.
