Special Instructions for Finishing Your Jacob Ornaments

After hooking, cut your ovals out, leaving about 1” of burlap all around.

With a needle and thread, tack down the burlap very close to the foldline. Make sure you dig deep with your needle, so you're not just grabbing the yarn.

Trim away the excess burlap. With a steam iron, press the ornaments.

Hot glue (or hand-sew) the pipe cleaners to the back. Hot glue (or hand-sew) the ribbon to the back if you want to hang your ornament. If you prefer to make it a magnet, then skip that step and hot glue (or hand-sew) the felt backing on the back of the ornament. Trim the excess felt around the edges. Then remove the white peel from the magnet and hot glue that side to the felt on the back of your ornament.
