

TEA JOURNEYS

BREWING GUIDE

TEA TASTE AND FLAVOUR WHEEL

Brewing tea is a simple process that involves just a few ingredients - water, tea leaves, and a teapot. Yet, even if you measure the ingredients and follow the same process every time, the aroma and taste of the tea can still vary slightly. This is what makes tea enjoyable every day, as you never know exactly what you will get. To ensure that you get the most out of your tea, we can provide you with a guide to help you control the three key factors of tea brewing: water temperature, steeping time, and tea-to-water ratio.

We guarantee the quality of our tea by carefully sourcing it from trusted suppliers with whom we have personal connections. You can be assured of the quality of the tea and the experience you will enjoy with each cup. Not only will you taste the delicious flavour of the tea, but you will also experience the culture that we bring with it.

DRINKING POWDERS

For best results mix 1 heaped tablespoon (25gm) of your favourite drinking powder with 25-30ml of boiled water. Stir until the powder has dissolved and has a syrup consistency, then add 200ml of heated milk and enjoy.

Tea	Weight (g)	Tea	Water (ml)	Milk (ml)
Kakaoda	25	1 hTb	20	200
Kick 'n Kakaoda	25	1 hTb	20	200
Urban Chai	20	1 hTb	30	200
Tina Turmer	20	1 hTb	30	200
Matcha Man	20	1 hTb	20	200
White Snow	15	1 hTb	15	200
Stickichai	20	1 hTb	--	200
