COMPREHENSION TEST SKILLS – BEGRIPISTOETSVAARDIGHEDE

To read with understanding is a crucial life skill which will assist you in many aspects of your career.

What does the word "comprehension" mean?

- To comprehend means to understand.
- Content, character and sequence will become clear.
- Confusion will be cleared up.
- Engaging with the text will enable you to think and reflect.

Use a structured approach (*benadering*) to a comprehension test and truly engage (*raak betrokke*) with it. Apply it to the example below:

1. While reading the heading, subheading and any other clues to the content, decide what it is about and what you know about the topic.
2. By skim-reading each paragraph, decide what you have been told.
3. It is helpful to read the questions before you read the text as you will understand what the topic is very quickly.

EXAMPLE

Ek het hom nie herken nie.

Find the root of the word you do not understand – *herken*:
ken = know, recognise
her- = again (weer)
therefore *herken* = to know/recognise again

4. After reading the questions, read the text carefully. Underline sections that seem relevant. Read the questions before reading the text. This will help you to understand the text.

5. Answer the questions. When you scan (*vluglees*) the text, ask yourself if you have answered the question correctly.

- Use the mark allocation as your guideline.

EXAMPLE

Watter kleur is haar oë? Gee net EENwoord.

Antwoord: Blou. ✓

Antwoord: Haar oë lyk soos poele damwater. ✗

- FAL/EAT learners are advised to write a short answer without repeating the question. Even a one-word answer will suffice. Other aspects to consider include: Did I answer as requested by the examiner?; Are my punctuation and spelling correct?

Use this strategy when you do the following comprehension test:

literal meaning: to smell something	Snuf in die neus	heading
figurative meaning: to become suspicious (idiom)	Mmm, ek is nou lekker agterdogtig! Is dit pizza wat ek ruik? Ons reuksintuig help ons om meer oor die wêreld rondom ons te weet.	1. suspicious subheading topic of article
How does our sense of smell work?	1. Hoe werk dit? Jou reuksintuig maak gebruik van reukreceptore in jou neus. Reukmolekules in die lug verbind met jou reukreceptore en 'n loodskap word na die reuksentrum van jou brein gestuur sodat jy kan uitvind hoe iets ruik. Watfantasties is as jy pizza ruik, maar minder wonderlik as dit jou broer se vuil rugbykouse is wat rondlê ...	
message to brain	nice smell = pizza bad smell = brother's rugby socks

sound of sneezing	2. Aaaaa ... tiesjoe! Party mense is <i>allergies</i> ² vir stuifmeel. In die lente, wanneer die meeste plante blom, asem ons baie <i>stuifmeel</i> ³ in, veral van plante wat op <i>windbestuiwing</i> ⁴ staatmaak. As jy allergies vir stuifmeel is, kan dit <i>hooikoors</i> ⁵ veroorsaak. Jy nies en hoes, jou oë swel toe en jy voel <i>goor</i> ⁶ . Gelukkig is daar medisyne om jou hooikoors te beheer.	2. allergic 3. pollen 4. wind pollination 5. hayfever 6. bad
7. researchers	3. Navorsers ⁷ het bewys 'n mens kan jou bloedfamilie aan hul <i>reuk</i> ⁸ uitken. Dit beteken jou ma of pa kan waarskynlik jou reuk tussen 'n klomp ander mense s'n herken – en jy hulle s'n!	8. smell noun = reuk verb = ruik
9. bloodhounds	4. Bloedhonde ⁹ het 'n <i>supersintuig</i> ¹⁰ . Hulle is spesiaal geteel om 'n reukspoor te volg of dinge uit te snuffel. 'n Bloedhond se reuksintuig kan tot 100 miljoen keer sensitiever as 'n mens s'n wees!	10. super sense
