Feather Banner - Instructions

Step 1
Assemble the first 2 tapered fibreglass rods, starting with the thinnest rod and then adding the next size, making sure they fit snugly together.

Step 2
Insert these 2 rods into the sleeve on the side of the banners.

Step 3
Continue to add the next 2 metal rods until the top rod has been pushed all the way to the end of the sleeve.
Tip: It is important to ensure the rods are positioned right to the end of the sleeve.

Step 4
Bring the bungee string through the grommets on the bottom of the sleeves.
Bring it down and adjust the attention of the banner.
Secure the metal spring clip on the bottom of the banner to the movable anchor point on the bottom rod.
Tie string around the clip to secure the banner.

*Tip: If the banner is too loose or too tight, adjust the anchor point up or down accordingly.*

Feather Banner Base

Spike Base
Tap longer pole into the ground. Be careful not to tap & damage the shorter-thicker swivel spindle.
Insert the bottom of the pole of the banner into the shorter-thicker swivel spindle.

Cross Base (X Base)
The collapsible hard ground cross base weighs about 3 kg and is great for use indoor and outdoor.

Water Bag for Cross Base
To give added stability outdoors a water bag is optional for cross base. The water bag weighs up to about 24 lbs when full and we highly recommend its use outdoors.

Water Base
Option base fills with water to have additional weight.
Weight: 27 lbs (about 3 gallons of water)
