

kreon inti

kreon inti is a fully recessed downlight with a refined patented* optical system.

kreon inti fixed downlight has a built in dome set above a black or white internal louvre. The faceted dome adds a scattering play of brilliance and creates a first layer of ambiance.

kreon inti directional combines the dome effect of the downlight with a decentralized directional spotlight that has an angular adjustment of 30°. The diffused light from the

dome neutralizes the shadow of the directional spotlight in the light effect. The directional light creates the second layer of focused light.

The unique combination of a diffused downlight with a directional projector make kreon inti a two-in-one recessed ceiling luminaire.

LED spot 33° / 56°			4W		250lm
20°			1W		100lm

REMARKS

- ① The dome and directional spot need to be driven separately
- ② Tool is for use with kreon inti 80 fixed. One per project is recommended.

Thickness boardmaterial:
9-26mm
Gear excluded
IP20
