ZAP ⚡ TRAP

USER MANUAL

**PLEASE READ ALL INSTRUCTIONS
PRIOR TO USE.**

INSTALLATION INSTRUCTIONS

- Turn off the power before installing the Zap Trap to prevent any injury or accidental shock.
- Ensure that you do not touch the lamp before or after turning the power on.
- For indoor use. Do not leave device unattended outdoors.
- It can either be placed on a table or hung on your walls and ceiling.
- Ensure that the product is not within the proximity of any heat source, steam, or anywhere around corrosive gases.
- Before cleaning the product, make sure to turn it off and disconnect from the power source.
- Use the cleaning brush to remove any dead insects and debris.
- Do not soak the lamp and the brush in water to clean it to avoid causing damage to the product.
- Use one unit per 500 sq ft. Additional units will be required in larger areas.
- For the lamp to be effective, it needs to be placed at least 3 feet off the ground.

WARNINGS

- This product is not compatible with dimmer switches.
- Make sure to keep away from flammable materials such as paper, carpet, or other fabrics to avoid fire or combustion.
- Please do not insert any object through the grid to avoid the risk of electric shock.
- Please do not touch the lamp with your bare hands and use protective gloves suitable for handling electrical items.
- Always turn off the power first and allow it to cool down for a few seconds before touching the lamp.
- Keep the Zap Trap out of reach from children and pets.

OPERATION INSTRUCTIONS

- There are two options to power your Zap Trap. First, you can use batteries. Turn the top counterclockwise to open the battery case and insert 3 AAA batteries.
- Another option is using a USB cable. At the side of your Zap Trap, take off the safety cover of the USB port and insert the USB cable included in your package. Connect the other end of the cable to a USB port power source.
- After connecting the USB cable to a power source or utilizing batteries, turn to ON mode by pressing the UV light switch or the LED light switch. Both functions can be utilized at the same time or independently.

- To customize the LED light's function, press the ON switch, press again to turn on the warm light, and press it once more to turn to flicker mode.
- The most effective killing rate will happen during the evening when there are no competing light sources.
- Device may only repel certain types of pests and results may vary.

GENERAL

Please read these instructions carefully before using and installing your Zap Trap. Store and keep these instructions in a safe place for future reference.

Any changes and modifications done to the unit might make it unsafe to use. It may also cause damage or personal injury to modify the unit. This product is intended for domestic use only.

HOW ZAP TRAP WORKS

Get rid of pesky insects anywhere with Zap Trap! Our lamp features a UV light that attracts and kills flying insects without the use of chemicals and sprays that could cause harm to your skin. It also functions as a high performance LED light that can brighten whatever space you desire. With its compact and portable design, you can bring it anywhere you want! Plus it can either be powered by AAA batteries or by simply plugging it into a USB port, providing you with pest zapping power, throughout the day and night.
